

Investment Objective

The Fund aims to provide a medium/long-term capital appreciation from total return by combining exposure in equity and/or debt securities of companies that appear to benefit from developments in sustainable economy, demographics, health and lifestyle, disruption, technology, mobility, automation, space exploration and/or other global trends. To achieve this, the Sub-Fund will follow a flexible allocation strategy.

The Fund will invest its assets primarily (at least 51%) in units of UCITS and/or other UCIs including Exchange Traded Funds (ETF's) which mainly invest in equity securities and derivatives thereof and/or transferable debt securities and derivatives thereof that meet SFDR requirements of Article 8 or 9. This Fund promotes environmental and social characteristics and qualifies as product in accordance with Article 8 of SFDR.

That Fund may invest as per above in units of UCITS and/or other UCIs that themselves may be invested in Mainland China shares restricted to foreign investors such as China A shares or have exposure in emerging markets and/or derivatives.

Secondarily, the Sub-Fund may invest its assets in units of UCITS and/or other UCIs, including Exchange Traded Funds (ETF's) which mainly invest in bank deposits, money market instruments, short term bonds and/or any other equivalent investments; the UCITS that fall in this section do not have to be money market funds. In addition, the Sub-Fund may and will at times invest (up to 49% of its net assets) directly in bank deposits and money market instruments in adherence to the flexibility objective.

Investor Profile

This Sub-Fund has a medium risk profile and is addressed to investors seeking returns from a widely diversified portfolio whose assets are invested in units of UCITS (multi-manager) with various asset classes and investment objectives, and aim to benefit from their active management.

Portfolio Recap

During the quarter ending 29/12, major equity markets rallied. MSCI US gained the most with +6.88%, MSCI AC World gained +6.12%, MSCI Europe returned +6.11% and MSCI Japan +3.22% in Euro terms. Why Thematic Investing?

.....Because we look towards the future.....

Thematic investing focuses on predicted long-term trends rather than specific companies or sectors, enabling investors to access structural, one-off shifts that can change an entire industry.

- Megatrends are large, social, economic, political, environmental and technological transformations, which have high impact on the economy, society, cultures, personal lives and businesses.
- The 2020 Covid-19 pandemic accelerated a number of new trends, and generated new long term opportunities which we call MEGATRENDS.

Thematic Investing:

- ❖ Is very different to investing in world indices
- ❖ Is unconstrained and focuses on conviction holdings
- ❖ is about future expectations not past <<winners>>
