# Activity Report

## At December 31, 2013

### **(LF) Equity- Global Equities Fund**

The sub-fund increased by +17.03% on the Eurobank share class while the benchmark (50% DJ Industrial Average (€) +40% Eurostoxx 50 + 10% Nikkei 225 (€)) climbed by +19.96% during 2013. The sub-fund thus underperformed versus the benchmark. The sub-fund started the year overweight the European stock market, a position it maintained for a large part of the first half of the year. The sub-fund started the year underweight the US, although it quickly moved to an overweight position relative to its benchmark as it became clear that the economic recovery in the US was strengthening. Moreover, at the start of the year the Sub-fund added exposure to the stock market in Japan, following a large period of absence, as the announcement that the country intends to launch the largest quantitative easing of the past decade with the aim of boosting economic activity was expected to act as a positive catalyst for the country's stock market. Although, the rationale of the asset allocation proved correct over the year, the timing was not perfect. Indeed, European stock markets underperformed for much of the first half of the year as concerns regarding the debt crisis had not yet been fully overcome. Moreover, the Japanese stock market proved the best performing stock market among developed markets over the year. Thus, the sub-fund's initial position of overweighting Europe for most of the first half of the year and the Sub-fund's tactic of incrementally adding to its position in Japan had an adverse impact on the Sub-fund's yearly performance. During the second half of the year, the sub-fund moved again to an overweight position in Europe as European stock markets became more attractive with the European economy on the whole appearing to recover. Moreover, most European companies were trading at cheaper valuations than comparable American companies. Further, the sub-fund in the US moved to an underweight position at the beginning of the second half of the year before moving back to an overweight position towards the end of the year. Lastly, the sub-fund reduced its exposure to the stock market in Japan preferring to take some profits during the second half of the year. Although, the sub-fund for the most part performed well during the second half of the year compared to its benchmark, it was not enough to overcome the underperformance of the first half, thus finishing the year with a worse performance compared to its benchmark.

### **(LF) Equity - Emerging Europe Fund**

The sub-fund declined by -7.84% on the Eurobank share class during 2013 substantially outperforming the benchmark (90% MSCI Emerging Europe (€) + 10% EoniaTR Index <DBDCONIA Index> which declined by -10.38%. The sub-fund started the year with a relatively high total investment level, which it gradually reduced to a more neutral stance after the first quarter. More specifically, the sub-fund started the year overweight both the Russian and the Turkish stock markets relative to the benchmark but gradually reduced these positions. In Russia, the sub-fund moved to a more cautious stance following a very strong start to the year as the price of oil and certain basic metals declined. In Turkey, the sub-fund greatly reduced its exposure towards the end of the first half of the year, as the protests against the Erdogan government increased political uncertainty and weighed heavily on investor sentiment. On the contrary, towards the middle of the year the sub-fund substantially increased its exposure to Poland as the Central Bank in Poland reduced interest rates in a bid to boost economic activity. It should also be mentioned that, at the same time, the sub-fund added a small exposure to Hungary, up from the zero exposure it had maintained during the previous year. Towards the end of the year the sub-fund increased again its total investment level. The sub-fund substantially increased its exposure to the Russian stock market in order to capitalize on the cheap valuations that most companies trade at. The sub-fund also increased its exposure to the stock market in Turkey as following the significant correction during the preceding months the market became more attractive while the political risk abated as the protests ceased. The sub-fund also added further exposure to the Polish stock market. The sub-fund reduced considerably its exposure to the Czech stock market.

## **Activity Report At December 31, 2013 (continued)**

### **(LF) Equity - Emerging Europe Fund (continued)**

Lastly, the sub-fund maintained almost unchanged its exposure to the Romanian stock market. The timing of the individual country allocation as well as the specific sector exposure for the most part benefitted the sub-fund's performance. Moreover, the sub-fund's off-benchmark exposure to the Romanian stock market also benefitted its performance as the Romanian stock market performed very well during 2013.

### **(LF) Equity - Greek Equities Fund**

The annual return of the sub-fund was +33.67% versus +28.06% of the benchmark (ASE General Index). During the year the market realized many ups and downs. The sub-fund during the first quarter diminished its total investment level, due to the retracement of the positive trend of the market when the banking crisis in Cyprus took place. The sub-fund maintained the high exposure to the telecom and utility sectors. During the second quarter, the sub-fund adopted the same investment strategy, waiting for the procedure of recapitalization of the banks, where it participated increasing significantly its exposure into the sector. During the second half of the year, the sub-fund maintained its high investment level, which benefitted the sub-fund from the intense positive momentum of the market, due to investment interest for Greek assets from abroad and the reclassification of the Athens Stock Exchange from developed to emerging market into the MSCI indices.

### **(LF) Equity - Institutional Portfolios Fund**

During 2014, the sub-fund recorded on the Eurobank share class returns of +37.72%, overperforming the benchmark (ASE General Index which returned +28.06%) by 9.66%. The Greek equity market was mainly characterized by volatility due to several facts such as the banking crisis in Cyprus, the implementation of the first privatization and developments in the banking sector. During the first quarter of the year, the sub-fund was mainly underweight relative to its benchmark with higher exposure in telecoms and utilities. During the second quarter, the sub-fund decreased further its total investment level due to the turbulence created from the failure of the DEPA privatization which moved the market lower. During the third quarter, the sub-fund changed its position to an overweight stance because of the progress in privatizations and advances in the restructuring of banking sector, investing mainly in telecom, utility and gaming sectors and increasing its exposure in the banking sector. During the last quarter of the year, the sub-fund maintained its high investment level, due to the reclassification of Greek market from developed to emerging markets from MSCI and the raised interest of foreign investors as followers of relative indices.

### **(LF) - Income Plus \$ Fund**

The sub-fund rose by 2.12% for 2013 while its composite benchmark (90% 6 month USD Libor (US0006M Index) + 10% ML Greek Government All Maturities Bond Index (G0GR)) returned +4.65% due to the rally in Greek Government bonds. The sub-fund was invested by 6% in global short dated investment grade corporate and senior financial debt. The 28% exposure in Greek T-bills was fully hedge back into USD through the use of FX swaps. The remainder was invested in USD deposits mostly in local Greek institutions.

## **Activity Report At December 31, 2013 (continued)**

### **(LF) Absolute Return Fund**

The sub-fund returned 5.08% on the Eurobank share class and outperformed its target return (Average ECB rate <EURR002W>+ 2.5%) which amounted to +3.08% for the year. The sub-fund gained from its positions in Greek and European periphery credits and sovereign bonds. Opportunistic positioning in Greek equities also contributed positively to performance. The sub-fund's volatility remained well within limits throughout the year.

### **(LF) Special Purpose Click Fund**

The sub-fund's performance is mainly linked to the level of the swap rates/credit spreads, the performance of the underlying equity basket and the implied volatility of the underlying equity basket. The combination of these market factors resulted in the positive return of +8.30% on Eurobank share class for 2013.

### **(LF) Special Purpose Double Click Fund**

The sub-fund's performance is mainly linked to the level of the swap rates/credit spreads, the performance of the underlying equity basket and the implied volatility of the underlying equity basket. The combination of these market factors resulted in the positive return of +4.25% on Eurobank share class for 2013.

### **(LF) Special Purpose All Weather Fund**

The sub-fund's performance is mainly linked to the level of the swap rates/credit spreads, the performance of the underlying equity index Eurostoxx50 and the implied volatility of the underlying equity index. The combination of these market factors resulted in a positive return of +5.82% on Eurobank share class for 2013.

### **(LF) Special Purpose All Weather Plus Fund**

The sub-fund's performance is mainly linked to the level of the swap rates/credit spreads, the performance of the underlying equity index Eurostoxx50 and the implied volatility of the underlying equity index. The combination of these market factors, resulted in a positive return of +7.06% on Eurobank share class for 2013.

### **(LF) Cash Fund (PLN)**

The (LF) Cash Fund (PLN) was invested mainly in deposits in Polish and Western European banks and also held a small amount in Polish government bonds and bills. All investments were liquidated during Q4 2013 ahead of the liquidation of the Polbank class which constituted the client base of the sub-fund. Following the liquidation of this class no investments were held at year-end as the only class of shares outstanding was the Eurobank class with no clients.

## **Activity Report**

### **At December 31, 2013 (continued)**

#### **(LF) Equity - Dynamic Polish Fund**

The sub-fund registered gains of +3.84% on the Eurobank share class (EUR denominated; the only one still active on December 31, 2013) during the whole year 2013 while the Polbank share class (PLN denominated) which was liquidated on December 20, 2013 recorded gains of +3.89% for as long as it was active, underperforming the benchmark (90% WSE WIG Index (WIG) + 10% Polish Government (1-4 Y) Bond Index (GFPL)), which gained +7.22% during the same period (till December 20, 2013). The sub-fund, at the beginning of the year, maintained a relatively high level of total investment. At the start of the year the sub-fund increased its total exposure to the banking sector. Moreover, the sub-fund increased its exposure to the consumer goods sector, as consumption rebounded to a certain extent following a substantial slowdown at the end of the previous year. Towards the middle of the year, the sub-fund increased further its total exposure to the banking sector. On the contrary, at the start of the year the sub-fund decreased its exposure to the basic metals sector due to the weakening trends observed in this sector globally. Towards the end of the year, the sub-fund maintained a more neutral position compared to the benchmark. It should be noted that towards the end of the year (December 20, 2013) the biggest share class, ie Polbank share class, which accounted for the vast majority of the AUM of the sub-fund, was liquidated. As a consequence, the sub-fund was obliged to liquidate a large portion of the portfolio to accommodate the large redemptions, which did not coincide well with market timing. To a large extent, this is the reason for the sub-fund's substantial underperformance compared to its benchmark.

#### **(LF) Balanced - Polish Fund**

The sub-fund started the year with a relatively high level of total investment, which it increased further during the first quarter. More specifically, the sub-fund increased somewhat its total exposure to the banking sector, where it maintained an overweight position compared to the benchmark (50% WSE WIG Index (WIG) + 50% Polish Government (1-4 Y) Bond Index (GFPL)). Moreover, the sub-fund increased its exposure to the consumer goods sector, as consumption rebounded to a certain extent following a substantial slowdown towards the end of the prior year. Towards the middle of the year, the sub-fund also increased its position in the country's telecom incumbent, as the stock, following a significant correction since the beginning of the year was trading at a more attractive valuation. Towards the end of the year (at December 20, 2013), though, the sub-fund was liquidated in its entirety (Polbank share class). Up to that point, in 2013, the sub-fund had recorded gains of +1.22% versus +5.43% for its benchmark. However, the comparison of the performance of the sub-fund to that of its benchmark is rendered meaningless due to large redemptions occurred prior to the final liquidation. Indeed, the sub-fund was obliged to sell incrementally its total portfolio of stocks to accommodate initially the redemptions and finally the total liquidation. On November 13, 2013 the Eurobank share class was activated to accommodate the investment of the management company in the sub-fund and this was the only existing share class closing 2013.

#### **(LF) Special Purpose Dual Formula Fund**

The sub-fund's performance is mainly linked to the level of the swap rates/credit spreads, the performance of the underlying index Eurostoxx Select Dividend 30, the over-performance of Eurostoxx Select Dividend 30 against DAX and the implied volatilities of the two equity indices. The combination of these market factors resulted in a positive return of +6.48% on Eurobank I share class for 2013.

## **Activity Report**

### **At December 31, 2013 (continued)**

#### **(LF) Equity - Dynamic Romanian Fund**

The sub-fund realized positive returns of +18.32% on the Eurobank share class albeit underperforming the benchmark Bucharest Stock Exchange Trading Composite Index (BET-C) which rose by +19.17%. The sub-fund at the beginning of the year maintained a somewhat neutral stance relative to the benchmark. More specifically, at the start of the year, the sub-fund increased its exposure to the banking sector. Moreover, the sub-fund increased its exposure to the consumer goods sector, as consumption rebounded to a certain extent following a substantial slowdown during the last quarter of the prior year. Lastly, the sub-fund decreased its exposure to the basic metals sector due to the weakening trends in this sector observed globally. Towards the middle of the year the sub-fund further increased, to a certain extent, its total exposure to the banking sector mainly by adding new positions. The sub-fund also maintained its sizable position in the SIFs throughout the year, which during the first half of the year was detrimental to the sub-fund's performance as the SIFs underperformed the broader market. During the second half of the year though this trend reversed as the SIFs outperformed the broader market significantly and thus contributed positively to the sub-fund's performance. The SIFs are not included in the sub-fund's benchmark. The sub-fund's underperformance relative to the benchmark may be attributed mainly to the sub-fund position in Fondul Proprietatea, where the sub-fund despite having a large position was nevertheless underweight. Fondul registered large gains during the year. Moreover, the sub-fund maintained zero exposure to the stock of Rompetrol Rafinare, which also registered considerable gains.

#### **(LF) Special Purpose Blue Chips Protect Fund**

The sub-fund's equity strategy matured in December 2012 and a new equity strategy started on January 14, 2013. Under the new strategy the sub-fund's performance is mainly linked to the level of the swap rates/credit spreads, the performance of the underlying equity index Eurostoxx50 and the implied volatility of the underlying equity index. The combination of these market factors, and mainly the tightening of Greek and other sovereign credit spreads and the equity index positive performance, resulted in the positive return of +8.86% on Eurobank I share class for 2013.

#### **(LF) Special Purpose Blue Chips Protect II Fund**

The sub-fund's equity strategy matured on April 2, 2013 negatively performing at -9.55% since April 2, 2008 ("Strike Date"). A new equity strategy was launched starting on April 25, 2013. Under the new strategy the sub-fund's performance is mainly linked to the level of the swap rates/credit spreads, the performance of the underlying equity index Eurostoxx50 and the implied volatility of the underlying equity index. The combination of these market factors and mainly the tightening of Greek and other sovereign credit spreads and the equity index positive performance, resulted in the positive return of +4.67% on Eurobank I share class for 2013.

## **Activity Report At December 31, 2013 (continued)**

### **(LF) Special Purpose 8.5% Equity Formula PLN Fund**

The sub-fund's performance is mainly linked to the return of a basket made out of three indices (EURO STOXX 50, S&P 500, WIG20). The sub-fund's performance is also linked to the short term implied volatilities/correlations of the three indices. The sub-fund's equity strategy matured on October 17, 2013 and a coupon of 8.5% calculated on the unit price on October 17, 2012 ("Strike Date") was paid. The sub-fund was then merged with the (LF) Cash Fund (PLN), by contributing all of its assets to it, effective on November 29, 2013.

### **(LF) Special Purpose 5.5% Equity Formula € Fund (previously (LF) Special Purpose 8% Equity Formula € Fund)**

(LF) Special Purpose 8% Equity Formula € Fund equity strategy matured on September 30, 2013 and a coupon of 8% calculated on the unit price on September 28, 2012 ("Strike Date") was paid. A new equity strategy started on November 1, 2013. Under the new strategy the sub-fund's name changed from "(LF) Special Purpose 8% Equity Formula € Fund" to "(LF) Special Purpose 5.5% Equity Formula € Fund". Also, index NIKKEI, one of the three basket indices, was replaced with FTSE 100 and the barrier level of the equity strategy changed from 60% to 70%. The sub-fund's performance is mainly linked to the return of a basket made out of three indices. The sub-fund's performance is also linked to the short term implied volatilities/correlations of the three indices and the level of the short dated swap rates/credit spreads. The combination of these market factors resulted in the negative return (coupon excluded) of -1.69% on Eurobank share class for 2013.

### **(LF) Special Purpose 4.5% Equity Formula \$ Fund (previously (LF) Special Purpose 6% Equity Formula \$ Fund)**

(LF) Special Purpose 6% Equity Formula \$ Fund equity strategy matured on September 30, 2013 and a coupon of 6% calculated on the unit price on September 28, 2012 ("Strike Date") was paid. A new equity strategy started on November 1, 2013. Under the new strategy the sub-fund's name changed from "(LF) Special Purpose 6% Equity Formula \$ Fund" to "(LF) Special Purpose 4.5% Equity Formula \$ Fund". Also, index NIKKEI, one of the three basket indices, was replaced with FTSE 100, and the barrier level of the equity strategy changed from 60% to 70%. The sub-fund's performance is mainly linked to the return of a basket made out of three indices. The sub-fund's performance is also linked to the short term implied volatilities/correlations of the three indices and the level of the short dated swap rates/credit spreads. The combination of these market factors resulted in the negative return (coupon excluded) of -1.20% on Eurobank share class for 2013.

### **(LF) Special Purpose Blue Chips Protect III Fund**

The sub-fund's equity strategy matured on July 18, 2013 negatively performing at -8.98% since July 18, 2008 ("Strike Date"). A new equity strategy was launched starting on September 5, 2013. Under the new strategy the sub-fund's performance is mainly linked to the level of the swap rates/credit spreads, the performance of the underlying equity index Eurostoxx50 and the implied volatility of the underlying equity index. The combination of these market factors and mainly the tightening of Greek and other sovereign credit spreads and the equity index positive performance, resulted in the positive return of +4.70% on Eurobank I share class for 2013.

## **Activity Report**

### **At December 31, 2013 (continued)**

#### **(LF) Cash Fund (RON)**

The return of the (LF) Cash Fund RON was boosted by its exposure in Greek assets including Greek corporates, Greek Treasury Bills, and term deposits with Greek Banks. The sub-fund finished the year with a return of 6.02% outperforming the benchmark (Romania ROBOR 3 Months (BUBR3M)) by a wide margin (the benchmark's performance was +4.03% for the same period). RON denominated Romanian Treasury Bills were the main assets held by the sub-fund throughout the year

#### **(LF) Balanced - Active Fund (RON)**

The sub-fund registered a +12.17% gain on the Bancpost share class basically in line with its benchmark (50% Romania ROBOR 3 Months (BUBR3M) + 50% Bucharest Stock Exchange Trading Composite Index (BET-C)), which increased by +12.03% during 2013. Although total investment levels fluctuated somewhat, the sub-fund, regarding its equity exposure, maintained an elevated investment level during the year. At the beginning of the year, the sub-fund decreased its exposure somewhat to the energy sector by taking profits following the substantial rally that this sector had realized since the prior year. The sub-fund towards the middle of the year substantially increased its exposure to the stock of Fondul Proprietatea, which benefitted the sub-fund as this stock registered large gains. The sub-fund also maintained its sizable position in the SIFs throughout the year, which during the first half of the year was detrimental to the sub-fund's performance as the SIFs underperformed the broader market. During the second half of the year though this trend reversed as the SIFs outperformed the broader market significantly and thus contributing positively to the sub-fund's performance. The SIFs are not included in the sub-fund's benchmark.

Regarding the sub-fund's bond exposure the sub-fund maintained its position in Romanian Treasury Bills throughout the year, replacing maturing securities with newly issued ones which the sub-fund obtained by participating in auctions on the primary market. The sub-fund's overall performance was also boosted by the significant capital gains that were due to the fall in Romanian yields.

#### **(LF) Equity - Flexi Style Greece Fund**

The sub-fund performed better than the benchmark returning +36.52% versus +28.06% of the benchmark (ASE General Index) in 2013. The intense volatility was the main characteristic of the Greek equity market during 2013. During the first quarter the sub-fund eliminated its position in the banking sector, as the recapitalization of the sector was expected to adversely impact the stock prices of the banks. Finally, the sub-fund increased its exposure to companies that are expected to be privatized. The sub-fund maintained high total investment position but diminished its equity exposure when approaching the procedure of the banks recapitalization, through which increased again its exposure. Total investment levels maintained at a very high level for some periods as compared with the benchmark. This strategy proved to be very successful given the very positive reaction of the market with a trigger point during last quarter the reclassification of the Greek market into MSCI indices from developed to emerging markets.

## **Activity Report**

### **At December 31, 2013 (continued)**

#### **(LF) Cash Fund (EUR)**

The return of the (LF) Cash Fund EUR for the year 2013 amounted to 8.05%. The outperformance of the sub-fund for yet another year was impressive since the benchmark's (90% Euribor 6 Months (EUR006M) + 10% ML Greek Government All Maturities Bond Index (G0GR)) performance was limited to 6.01%. This outperformance is due to the significant exposure in Greek corporate bonds mainly during the first half of the year. In order to realize those gains a large part of this bond portfolio was sold during the course of the year. In the second half of the year we increased our positions in Greek Treasury Bills close to the regulatory limit of 35% since their yield was materially superior to that of deposits in Greek banks.

#### **(LF) Special Purpose Greek Max 50 Fund**

The sub-fund's performance is mainly linked to the level of the swap rates/credit spreads, the performance of the underlying Greek equity index (FTSE/ASE LARGE CAP) and the implied volatility of the underlying equity index. The sub-fund's equity strategy matured on December 23, 2013, and given that the Greek equity index had a negative return during the investment period, the equity strategy resulted in 0% return for the investors. The sub-fund was merged with (LF) Cash Fund EUR effective on January 29, 2014, by contributing all of its assets to it. The sub-fund's return was -0.10% on Interamerican share class for 2013.

#### **(LF) Greek Government Bond Fund**

The sub-fund returned +43.3%. The rise was driven by the rally in Greek Government Bonds as the normalisation of the Greek yield curve continued in line with the large improvements in the twin deficits (budget and current account) and the overall improvement in the Eurozone economic indicators. The sub-fund was 94% invested in Greek Government Bonds throughout the year and by 0.5% in Greek corporates. The sub fund held overweight positions in the belly of the Greek curve.

#### **(LF) Equity - Turkish Equity Fund**

The sub-fund declined by -30.34% on the Eurobank share class during 2013 while the benchmark (Istanbul Stock Exchange Index (ISE 100) (XU100)) registered a -31.03% loss in what proved to be a very difficult year for Turkish equities. The sub-fund started the year underweight the banking sector while increasing substantially its exposure mainly to the construction and building materials, industrial metals and to a certain extent telecoms sectors. Due mostly to the increase in the aforementioned sectors, the sub-fund at the beginning of the year increased its total investment level which it maintained at very elevated levels till almost the middle of the year. This strategy benefitted the sub-fund as for the larger part of the first half of the year the Turkish stock market performed well. The sub-fund, towards the end of the first half of the year, though, reduced its total investment level. The large protests that took place in Istanbul, which quickly spread to most large cities in Turkey, weighed heavily on investor sentiment and consequently the sub-fund maintained a more conservative stance. Moreover, the prospect of the FED beginning to taper its bond purchases, as the market was expecting in September, also warranted retaining this more conservative stance. After the FED though initially kept its monetary policy intact in September the sub-fund increased anew its total investment level to relatively high levels as following the correction the Turkish stock market was more attractive.

## **Activity Report At December 31, 2013 (continued)**

### **(LF) Equity - Turkish Equity Fund (continued)**

The sub-fund during the third quarter was mainly overweight the industrials sector relative to the benchmark. The sub-fund decreased its total investment level towards the end of the year which benefitted the sub-fund as the stock market corrected greatly. Beyond the FED's finally signalling a change in its monetary policy, which adversely impacts countries such as Turkey with large current account deficits, political developments were a key catalyst. Political risk increased dramatically as an anti-corruption investigation targeting key business persons as well as government figures and members of their families was launched towards the end of the year.

### **(LF) Total Return Fund**

The sub-fund recorded yearly gains of +2.03% and +3.05% in class A shares and class B shares respectively. The sub-fund's core strategy was to keep market exposure at modestly low levels throughout the year as indicated by the fact that during the first 3 quarters cash and cash equivalents were the biggest asset class and accounted on average for ca. 45% of the sub-fund's NAV. During that period, equities accounted on average for ca. 42.5% of the sub-fund's NAV, equally split between the Eurozone and the US while they were hedged in order to decrease volatility and contain the adverse effect of a potential FED QE tapering. The fixed income part of the sub-fund represented ca. 13% of the portfolio during the first 3 quarters of the year and consisted mainly of corporate bonds. In the last quarter of the year, the sub-fund's market exposure was increased due to changes that were made in asset class weightings. Equities were increased to ca 53% of the portfolio, again equally split between the US and the Eurozone. US equities were fully hedged while the Eurozone equity exposure tactically shifted its focus to the southern European stock markets and was only partially hedged. Bonds were increased to 22% of the portfolio with a significant portion of them allocated to Greek government bonds (50% of bond portfolio holdings). By the end of the year, cash only accounted for 25% of the portfolio. Despite these changes during the 4th quarter, overall the sub-fund's core strategy of maintaining low market exposure remained intact and only on a tactical level was increased slightly by shifting its focus to the southern European markets both on equities and bonds at the end of the year.

### **(LF) Special Purpose Equity Formula Bonus II Fund**

The sub-fund's performance is mainly linked to the level of the medium dated swap rates/credit spreads, the performance of the underlying Euro Stoxx Banks Index and the medium dated implied volatility of the underlying Euro Stoxx Banks Index. The sub-fund was merged with (LF) Special Purpose Equity Formula Bonus I Fund effective on May 24, 2013, by contributing all of its assets to it. The sub-fund's performance for 2013 (until the effective date of the merger) was +0.50% on Eurobank share class.

### **(LF) Special Purpose - 10% Equity Formula (RON) Fund**

The sub-fund's performance is mainly linked to the level of the short dated swap rates/credit spreads, the performance of the underlying index Eurostoxx50 and the short dated implied volatility of the underlying index. The sub-fund's equity strategy matured successfully on May 14, 2013. A similar equity strategy was rolled over for one year starting on June 28, 2013, and the sub-fund's name changed from "(LF) Special Purpose – 11.5% Equity Formula (RON) Fund" to "(LF) Special Purpose – 10% Equity Formula (RON) Fund". The sub-fund's return was +11.72% on Bancpost share class.

## **Activity Report At December 31, 2013 (continued)**

### **(LF) Special Purpose - EUR/PLN – FX Formula Fund**

The sub-fund's performance is mainly linked to the level of the short dated swap rates/credit spreads, the appreciation of the PLN against EUR rate and the short dated implied volatility of the EUR/PLN FX rate. The sub-fund's currency strategy matured on June 6, 2013. The performance of the sub-fund since Strike Date was -4.30%. The sub-fund was merged with the (LF) Cash Fund (PLN), by contributing all of its assets to it, effective on September 17, 2013. The sub-fund's performance for 2013 (until the effective date of the merger) was -0.43% on Polbank share class.

### **(LF) Special Purpose Equity Formula Bonus I Fund**

The sub-fund's performance is mainly linked to the level of the medium dated swap rates/credit spreads, the performance of the underlying Euro Stoxx Banks Index and the medium dated implied volatility of the underlying Euro Stoxx Banks Index. The combination of these market factors, and mainly the tightening of Greek and other sovereign credit spreads and the equities positive performance, resulted in the positive return of +8.75% on Eurobank share class for 2013.

### **(LF) Money Market Fund - Reserve**

The return of the (LF) Money Market Fund - Reserve amounted to -0.047% underperforming versus the benchmark by 11 basis points.

### **(LF) Global Bond Fund**

The sub-fund returned 2.40%, significantly outperforming the benchmark (70% Merrill Lynch EMU Broad Market Index 3-5 years + 30% Merrill US Treasuries Index) index which rose by 0.24%. The sub-fund's strategy over the course of Q1 and Q2 was mostly equal weight the benchmark index with opportunistic positions in European periphery initiated when market conditions permitted. However, the strategy changed during Q3 and Q4 to overweight exposure in Euro periphery debt, including Portugal and Greece, once continued capital inflows into Euro zone coupled with improving economic indices became evident. US treasury exposure remained underweight the benchmark index through the year.

### **(LF) Equity - Middle East - North Africa Fund**

The sub-fund's retail portion increased by 22.02% in 2013 while the institutional portion climbed by 21.47%, significantly outperforming the benchmark (MSCI Arabia markets, ex Saudi Arabia) by 9.96% and 9.41% respectively. The sub-fund was mainly invested in large cap stocks and remained highly invested (95%). The sub-fund remained throughout the year with a substantial underweight position in the Kuwaiti stock market and a middle overweight in UAE and Qatari market, mainly through exposure to the banking sector, to real estate and telecom sector. The sub-fund was overweight in Egyptian market, mainly via consumer goods and banks. The Dubai stock market was the best performing market in the region followed by Abu Dhabi, Qatar, Egypt and Kuwait. On the other hand, the sub-fund maintained a small position in Lebanon, Oman, Jordan and Morocco.

## **Activity Report At December 31, 2013 (continued)**

### **(LF) Special Purpose Best Performers Fund**

The sub-fund's performance is mainly linked to the level of the long dated swap rates/credit spreads, the performance of the underlying equity basket and the long dated implied volatility of the underlying equity basket. The combination of these market factors and mainly the tightening of sovereign credit spreads and the equities positive performance resulted in the positive return of +15.86% on Eurobank I share class for 2013.

### **(LF) Greek Corporate Bond Fund**

The sub-fund was launched as of June 3, 2013 and returned + 14.4% since inception. The sub-fund held investment in Greek corporate bonds in excess of 52% of NAV, a 32% investment in Greek government bonds and the remainder in short term deposits. Expectations for new corporate issuance in the last 4-5 months of 2013 did not materialize and this prevented the sub-fund from further increasing exposure and diversification in Greek corporate bonds. The main drivers of returns were the large spread compression of Greek corporate bonds and the normalisation of the Greek sovereign curve.

### **(LF) Special Purpose Best Performers II Fund**

The sub-fund was launched in 2013, with strike date on December 20, 2013. The sub-fund's performance is mainly linked to the level of the long dated swap rates/credit spreads, the performance of the underlying equity basket and the long dated implied volatility of the underlying equity basket. The combination of these market factors resulted in the positive return of +0.33% on Eurobank I share class for 2013.

The figures stated in this report are historical and not necessarily indicative of future performance.

Luxembourg, April 29, 2014

## **Audit report**

To the Unitholders of  
**(LF)**

---

We have audited the accompanying financial statements of (LF) and of each of its sub-funds, which comprise the statement of net assets and the schedule of investments as at December 31, 2013, and the statement of operations and the statement of changes in net assets for the year then ended, and a summary of significant accounting policies and other explanatory notes to the financial statements.

### *Responsibility of the Board of Directors of the Management Company for the financial statements*

The Board of Directors of the Management Company is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation of the financial statements and for such internal control as the Board of Directors of the Management Company determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

### *Responsibility of the “Réviseur d’entreprises agréé”*

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier”. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the judgment of the “Réviseur d’entreprises agréé”, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the “Réviseur d’entreprises agréé” considers internal control relevant to the entity’s preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Board of Directors of the Management Company, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

*Opinion*

In our opinion, the financial statements give a true and fair view of the financial position of (LF) and of each of its sub-funds as of December 31, 2013, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation of the financial statements.

*Other matters*

Supplementary information included in the annual report has been reviewed in the context of our mandate but has not been subject to specific audit procedures carried out in accordance with the standards described above. Consequently, we express no opinion on such information. However, we have no observation to make concerning such information in the context of the financial statements taken as a whole.

# Notes to the financial statements

## As at December 31, 2013

### 1. General

(LF) (“the Fund”) is an open-ended investment fund which has been created on May 1, 2006 as a mutual investment fund (“Fonds Commun de Placement”) organised under Part I of the Luxembourg Law of 17 December 2010 relating to undertakings for collective investment (the “2010 Law”).

The Fund is managed by Eurobank Fund Management Company (Luxembourg) S.A. (the “Management Company”), a company incorporated under the laws of Luxembourg and having its registered office in Luxembourg.

The Management Company may issue units in several classes (collectively “Classes” and each a “Class”) in each Sub-Fund having: (i) a specific sales and redemption charge structure and/or (ii) a specific management or advisory fee structure and/or (iii) different distribution, Unitholder servicing or other fees and/or (iv) different types of targeted investors or distribution channels and/or (v) a different hedging structure and/or (vi) such other features as may be determined by the Management Company from time to time.

As at December 31, 2013, the following 36 sub-funds are active. 2 new sub-funds have been launched during the period from January 1, 2013 to December 31, 2013:

- (LF) Greek Corporate Bond Fund has been launched as of June 3, 2013.
- (LF) Special Purpose Best Performers II Fund has been launched as of November 11, 2013

## Notes to the financial statements

### As at December 31, 2013 (continued)

#### 2. Summary of significant accounting policies (continued)

(LF) Total Return Fund	EUR
(LF) Special Purpose - 10% Equity Formula (RON) Fund (formerly named (LF) Special Purpose - 11.5% Equity Formula (RON) Fund)	RON
(LF) Special Purpose Equity Formula Bonus I Fund (Merged with (LF) Special Purpose Equity Formula Bonus II Fund on May 24, 2013)	EUR
(LF) Money Market Fund - Reserve	EUR
(LF) Global Bond Fund	EUR
(LF) Equity - Middle East - North Africa Fund	EUR
(LF) Special Purpose Best Performers Fund	EUR
(LF) Greek Corporate Bond Fund (launched as of June 3, 2013)	EUR
(LF) Special Purpose Best Performers II Fund (launched as of November 11, 2013)	EUR

The combined financial statements of the Fund reflecting the assets and liabilities of all portfolios are expressed in Euro.

#### *b) Security Valuation*

Securities quoted or dealt in on any stock exchange or another regulated market are valued at the latest available price.

When such prices are not representative of the fair value of the relevant securities and in the case of unquoted securities, the valuation is based on the respective reasonable foreseeable sales price as determined prudently and in good faith by the Board of Directors of the Management Company of the Fund.

Cash equivalent or money market instruments with a remaining maturity of 60 days or less are stated at amortized cost, which approximates the market value.

Investments in open-ended UCIs are valued on the basis of the last available NAV of the units or shares of such UCIs.

# Notes to the financial statements

## As at December 31, 2013 (continued)

### 2. Summary of significant accounting policies (continued)

#### *c) Foreign currency translation*

The cost of investments and the transactions during the year, expressed in foreign currencies, are converted into the reporting currency of each Sub-Fund at the rate of exchange ruling at the time of the purchase or transaction.

The market value of investments and other assets and other liabilities, expressed in foreign currencies, are translated into the reporting currency of each Sub-Fund at end of period exchange rates. Exchange differences arising on foreign currency translation are taken to statements of operations. The combined statement is calculated at end of period exchange rates.

Closing exchange rates as at December 31, 2013 relating to EUR are:

1 BGN = 0.5113 EUR  
1 CHF = 0.8146 EUR  
1 GBP = 1.1995 EUR  
1 JPY = 0.0069 EUR  
1 PLN = 0.2407 EUR  
1 RON = 0.2237 EUR  
1 RSD = 0.0087 EUR  
1 TRY = 0.3378 EUR  
1 USD = 0.7251 EUR

#### *d) Interest and Dividend income*

Interest income is recognised on an accrual basis, net of any irrecoverable withholding tax. Dividends are recorded on an ex-dividend basis, net of any irrecoverable withholding tax.

#### *e) Formation expenses*

Formation expenses are amortised on a straight line basis over a period of 5 years.

#### *f) Forward foreign exchange contracts*

Forward foreign exchange contracts are valued at the forward rate applicable at the date of the statement of net assets of each Sub-Fund for the remaining period until maturity. Realised gains/losses and change in unrealised appreciation/depreciation resulting therefore are included in the statement of operations of each Sub-Fund under “Financial derivative instruments: options, swaps and forward contracts”.

## **Notes to the financial statements**

### **As at December 31, 2013 (continued)**

#### **2. Summary of significant accounting policies (continued)**

##### ***g) Valuation of option contracts***

The value of options that are traded on stock exchange is based on the closing prices published by the stock exchange where the company has concluded the related contracts. The liquidation value of options that are not traded on stock exchange is determined according to the guidelines decided by the Board of Directors of the Management Company, following uniform criteria for each type of contract.

**Purchased Options** - Premiums paid by the Fund for purchased options are included in the statement of net assets as an investment. The option is adjusted daily to reflect the current market value of the option and the change is recorded as unrealised appreciation or depreciation. If the option is allowed to expire, the Fund will lose the entire premium it paid and record a realised loss for the premium amount.

Premiums paid for purchased options which are exercised or closed are added to the amounts paid or offset against the proceeds on the underlying investment transaction to determine the realised gain/loss or cost basis of the security.

**Written Options** - Premiums received by the Fund for written options are included in the statement of net assets. The amount of the liability is adjusted daily to reflect the current market value of the written option and the change in market value is recorded as unrealised appreciation or depreciation. Premiums received from written options that expire are treated as realised gains. The Fund records a realised gain or loss on written options based on whether the cost of the closing transaction exceeds the premium received. If a call option is exercised by the option buyer, the premium received by the Fund is added to the proceeds from the sale of the underlying security to the option buyer and compared to the cost of the closing transaction to determine whether there has been a realised gain or loss. If a put option is exercised by an option buyer, the premium received by the option seller reduces the cost basis of the purchased security.

The realised gains/(losses) and change in unrealised appreciation/depreciation on options are disclosed in the statement of operations and changes in net assets respectively under the headings “Financial derivative instruments: options, swaps and forward contracts” and “Change in net unrealised appreciation/(depreciation) on financial futures, options and swaps.”

##### ***h) Valuation of financial futures contracts***

Upon entering into a futures contract, the Fund is required to deposit with the broker, cash or securities in an amount equal to a certain percentage of the contract amount which is referred to as the initial margin account.

The value of futures contracts that are traded on stock exchange is based on the closing prices published by the stock exchange where the company has concluded the related contracts. The value of futures contract that are not traded on stock exchange is determined according to the guidelines decided by the Board of Directors of the Management Company, following uniform criteria for each type of contract.

# Notes to the financial statements

## As at December 31, 2013 (continued)

### 2. Summary of significant accounting policies (continued)

The unrealised appreciation/(depreciation) on future contracts is disclosed in the statement of net assets under “Unrealised gain/loss on financial futures”. Changes in the market value of open futures contracts are recorded as unrealised appreciation/(depreciation) in the statement of operations under “Change in net unrealised appreciation/(depreciation) on financial futures, options and swaps”. Realised gains or losses, representing the difference between the value of the contract at the time it was opened and the value at the time it was closed, are reported at the closing or expiration of futures contracts in the statement of operations under “Net realised gains/(losses) on financial futures, options and swaps”. Securities deposited as initial margin account are designated in the schedule of investments and cash deposited is recorded on the statement of net assets. A receivable and/or a payable to brokers for the daily variation margin is also recorded on the statement of net assets.

#### *i) Valuation of swap contracts*

Swap transactions will be consistently valued based on a calculation of the net present value of their expected cash flows. The swaps will be valued based on the valuation elements laid down in the contracts and is obtained on a daily basis from the swap counterparty/ies based on the following method:

- Valuations are based upon observable data whenever directly available in the market or based upon model prices whenever data are non-directly observable in the market. As soon as every observable data (market closes) and non-directly observable (like implied volatilities & correlations) are collected, a pricing software starts computing the option prices of the swaps. Monte Carlo (number of drawings may vary from 1000 to 10000/20000 depending on the model's convergence rate), Closed Form or Finite Difference methods/models are used for assessing optional pay-offs depending on the options' complexity. ;
- Once the options are valued, the remaining data for computing the swaps Mark-To-Market, i.e. interest rate curves, etc. are collected and used to calculate the value of the swaps;
- The models and parameters used for the valuation are audited and validated by the swap counterparty's risk management departments, which operate independently from the front office. The final valuations of the swaps are reviewed and validated by the Risk Management department of Eurobank Asset Management Mutual Funds Management Company S.A..

Valuations provided by the swap counterparty/ies are compared with independent sources (Independent Broker quotes and/or Risk Management of Eurobank Asset Management Mutual Funds Management Company S.A.) according to the policies established in good faith by the Board of Directors.

The unrealised appreciation/(depreciation) is disclosed in the statement of net assets under “Financial derivative instruments: options, swaps and forward contracts”. Realised gains/(losses) and changes in unrealised appreciation/(depreciation) as a result thereof are included in the statement of operations respectively under “Net realised gain/(loss) on financial futures, options and swaps” and “Net change in unrealised appreciation/(depreciation) on financial futures, options and swaps”.

## **Notes to the financial statements**

### **As at December 31, 2013 (continued)**

#### **2. Summary of significant accounting policies (continued)**

##### *j) Realised gains and losses on sales of investments in securities*

Investments in securities are accounted for on a trade date basis. Realised gains and losses on sales of investments in securities are based on the average cost basis.

##### *k) Money Market and Cash Sub-Funds: cash and time deposits*

The following Sub-Funds invest their assets primarily in bank deposits and money market instruments accordingly with their investment objectives.

**Notes to the financial statements**

## **Notes to the financial statements**

### **As at December 31, 2013 (continued)**

#### **3. Management fees and performance fees (continued)**

The Management Company may further receive for certain Sub-Funds a performance fee as indicated in the relevant Appendices of the prospectus to the Sub-Funds concerned.

In (LF) Absolute Return Fund, a Performance Fee is calculated and accrued on each Valuation Day and paid on a quarterly basis, provided that the Net Asset Value per Unit before Performance Fee is higher than the Target Net Asset Value per Unit.

The Target Net Asset Value per Unit corresponds to the previous quarter end Net Asset Value per Unit multiplied by  $(1 + \text{the Benchmark})$ . The Benchmark is based on the calculated Weighted Average ECB rate +250bps, prevailing within the period (i.e. quarterly) and prorated over the period considered.

The Management Company will only be entitled to a Performance Fee if the quarter end Net Asset Value per Unit before Performance Fee is higher than any previous quarter end Net Asset Value per Unit on the basis of which a Performance Fee was paid (a “historical highest”).

The Performance Fee will be equal to 20% of the difference between the Net Asset Value per Unit before Performance Fee and the Target Net Asset Value per Unit multiplied by the average number of Units outstanding on each Valuation Day since the beginning of the quarter.

Payment of a Performance Fee may be due at the end of a quarter although the Benchmark has not been outperformed since last payment of a Performance Fee if (i) the quarter end Net Asset Value per Unit before Performance Fee outperforms the Benchmark over the quarter considered and (ii) the quarter end Net Asset Value per Unit corresponds to a “historical highest” as defined above.

In the (LF) Absolute Return II Fund, a Performance Fee, is calculated and accrued on each Valuation Day and paid on a quarterly basis, provided that the Net Asset Value per Unit before Performance Fee is higher than the Target Net Asset Value per Unit. The Target Net Asset Value per Unit corresponds to the previous quarter end Net Asset Value per Unit multiplied by  $(1 + \text{the Benchmark})$ .

The Benchmark is based on the calculated Weighted Average ECB rate + 200 basis points, prevailing within the period (i.e. quarterly) and prorated over the period considered.

The Management Company will only be entitled to a Performance Fee if the quarter end Net Asset Value per Unit before Performance Fee is higher than any previous quarter end Net Asset Value per Unit on the basis of which a Performance Fee was paid (a “historical highest”).

The Performance Fee will be equal to 20% of the difference between the Net Asset Value per Unit before Performance Fee and the Target Net Asset Value per Unit multiplied by the average number of Units outstanding on each Valuation Day since the beginning of the quarter.

## Notes to the financial statements

### As at December 31, 2013 (continued)

#### 3. Management fees and performance fees (continued)

Payment of a Performance Fee may be due at the end of a quarter although the Benchmark has not been outperformed since last payment of a Performance Fee if (i) the quarter end Net Asset Value per Unit before Performance Fee outperforms the Benchmark over the quarter considered and (ii) the quarter end Net Asset Value per Unit corresponds to a “historical highest” as defined above.

As of March 31, 2009, the Board of Directors of the Company has decided not to apply in favour of the Company the performance fee it is entitled to for the (LF) Absolute Return II Fund. The decision to waive the collection of performance fee for the Sub-Fund became effective as of April 1, 2009 and remains applicable until further resolution taken by the Directors. The sub-fund merged into (LF) Absolute Return Fund on May 24, 2013.

In (LF) Equity -Turkish Equity Fund a Performance Fee is calculated from the beginning of each calendar year, accrued on each Valuation Day and paid on an annual basis, at the end of each calendar year. The performance fee is paid provided that the Net Asset Value per Unit before Performance Fee is higher than the Target Net Asset Value per Unit. The Target Net Asset Value per Unit corresponds to the previous calendar year end Net Asset Value per Unit multiplied by  $(1 + \text{the Benchmark})$ .

As benchmark is defined the ISE 100 Index.

The Performance Fee will be equal to 20% of the difference between the Net Asset Value per Unit before Performance Fee and the Target Net Asset Value per Unit multiplied by the average number of Units outstanding on each Valuation Day since the beginning of the calendar year, and is capped to 3% of Net Asset Value of the Sub-fund.

In (LF) Total Return Fund, a Performance Fee is calculated from the beginning of each calendar year, accrued on each Valuation Day and paid on annual basis, at the end of each calendar year. The performance fee is paid provided that the Net Asset Value per Unit before performance is higher than the Target Net Asset Value per Unit.

The Target Net Asset Value per Unit corresponds to the previous calendar year end Net Asset Value per Unit multiplied by  $(1 + \text{the hurdle rate})$ .

The hurdle rate (benchmark) is set to a fixed 7%.

The Performance Fee will be equal to 20% of the difference between the Net Asset Value per Unit before Performance Fee and the Target Net Asset Value per Unit multiplied by the average number of Units outstanding on each Valuation Day since the beginning of the calendar year.

For the year 2013 a performance fee of:

- TRY 10,734.06 was payable for the (LF) Equity - Turkish Equity Fund - Eurobank class
- TRY 3,410.59 was payable for the (LF) Equity - Turkish Equity Fund – Eurobank I class
- TRY 7,244.32 was payable for the (LF) Equity - Turkish Equity Fund - Interamerican
- TRY 47.98 was payable for the (LF) Equity - Turkish Equity Fund - Postbank (BGN)
- TRY 2,650.35 was payable for the (LF) Equity - Turkish Equity Fund - Eurobank (USD)

# **Notes to the financial statements**

## **As at December 31, 2013 (continued)**

### **3. Management fees and performance fees (continued)**

- EUR 161,359.85 was payable for the (LF) Absolute Return - Eurobank class
- EUR 15,401.46 was payable for the (LF) Absolute Return - Eurobank I class

### **4. Custodian fees**

In consideration for its services, the Custodian is entitled to receive out of the assets of the relevant Sub-Fund a fee (the "Depositary Fee") payable at the end of each month in arrears at an annual rate not exceeding the percentage amount indicated in the Appendix relevant to each Sub-Fund of the Prospectus of the Fund. This percentage amount will be calculated on a daily basis on the Net Asset Value of that day of the relevant Class over the period by reference to which the fee is calculated. The Custodian may also receive transaction-based fees.

### **5. Administrative fees**

The Management Company shall pay, out of the Management Fee the fees and expenses due to the Administrative and Registrar Agent. The Administrative and Registrar Agent may also receive from the Fund transaction-based fees, which will be payable in addition to the Management Fee.

### **6. Taxation**

The Fund is liable in Luxembourg to an annual tax (the "taxe d'abonnement") of 0.05%, calculated and payable quarterly, on the aggregate Net Asset Value of the outstanding units of the Fund at the end of each quarter. This annual tax is however reduced to 0.01% on the aggregate Net Asset Value of the units in the Classes reserved to institutional investors as well as in Sub-Funds that invest exclusively in certain short-term transferable debt securities and other instruments pursuant to the Grand-Ducal Regulation of April 14, 2004.

### **7. Statement of changes in investments**

A list, for each Sub-Fund, specifying for each investment the total purchases and sales which occurred during the year under review, may be obtained free of charge, upon request, at the Registered Office of the Management Company.

### **8. Transactions relating to options, forwards, swaps, and financial futures contracts**

The Fund entered into a number of options, forwards, swaps and financial futures contracts. As at December 31, 2013 the positions were as follows:

### 9. Merger

The Board of Directors of the Management Company has decided to merge by contribution of all assets and liabilities:

- with effect on May 24, 2013:
  - (LF) Absolute Return II Fund into (LF) Absolute Return Fund
  - (LF) Special Purpose Equity Formula Bonus II Fund into (LF) Special Purpose Equity Formula Bonus I Fund
  
- with effect on September 17, 2013:
  - (LF) Special Purpose - EUR/PLN - FX Formula Fund into (LF) Cash Fund (PLN)
  
- with effect on November 29, 2013:
  - (LF) Special Purpose 8.5% Equity Formula PLN into (LF) Cash Fund (PLN)

These mergers are aiming at rationalizing the existing range of products and creating scope for investment efficiencies.

### 10. Brokerage and transactions fees

This item represents brokerage and transactions fees related to security transactions and derivatives transactions.

Transaction fees incurred by the Fund relating to purchase or sale of transferable securities, money market instruments, derivatives or other eligible assets are mainly composed of (Broker Fees, Transfer Fee, Stock Exchange Fee). For purchase or sale on bonds there are no transaction fees.

The amounts of the transaction fees are reflected in the Statement of Operations in the line "Brokerage and transaction fees".

### 11. Distribution

According to the prospectus of the Fund:

- a coupon of 8.5% calculated on the unit price on Strike Date has been paid as of October 17, 2013 in the (LF) Special Purpose 8.5% Equity Formula PLN Fund (which has merged into (LF) Cash Fund (PLN) as of November 29, 2013) for a total of PLN 14 505 789.05.

- a coupon of 8% calculated on the unit price on Strike Date has been paid as of September 30, 2013 in the (LF) Special Purpose 5.5% Equity Formula € Fund (formerly named as (LF) Special Purpose 8% Equity Formula € Fund) for a total of EUR 3 772 614.53.

- a coupon of 6% calculated on the unit price on Strike Date has been paid as of September 30, 2013 in the (LF) Special Purpose 4.5% Equity Formula \$ Fund (formerly named as (LF) Special Purpose 6% Equity Formula \$ Fund) for a total of USD 1 871 064.44.

# Notes to the financial statements

## As at December 31, 2013 (continued)

### 12. Hellenic Financial Stability Fund

On April 30, 2013 the Extraordinary General Meeting of the Shareholders approved:

1. The decrease of the share capital of Eurobank Ergasias S.A. (“the Bank”) by means of the parallel decrease of the total number of existing ordinary shares at a ratio of 10 old shares for each 1 new share (reverse split) and the decrease of the nominal value of the ordinary share of the Bank (as it will result after the reverse split) to Euro 0.30.

2. The increase of the share capital of the Bank, in accordance with the provisions of Law 3864/2010 and Act of Cabinet 38/9.11.2012, in order to raise Euro 5,839 million by issuing 3,789,317,357 new ordinary shares, covered entirely by the Hellenic Financial Stability Fund (“HFSF”) with the contribution of bonds issued by the EFSF and owned by the HFSF.

Eurobank Ergasias S.A. (“Eurobank”) signed on July 15, 2013 two binding agreements with the Hellenic Financial Stability Fund (“HFSF”) to acquire 100% of the shares and voting rights of New TT Hellenic Postbank S.A. (“HPB”) and New Proton Bank S.A. (“Proton”).

### 13. Polbank forced redemption

Following the decision to terminate the distribution, the polish payment agent and the representative agreements between Raiffeisen Bank Polska S.A. and Eurobank Fund Management Company (Luxembourg) S.A, PLN share classes were liquidated with effective date on December 20, 2013 in the following sub-funds:

- (LF) Equity -Greek Equities Fund
- (LF) Cash Fund (PLN)
- (LF) Equity - Dynamic Polish Fund
- (LF) Balanced - Polish Fund
- (LF) Equity - Turkish Equity

As at December 31<sup>st</sup>, 2013, the payment of the forced redemption proceeds to Polish unitholders has not been fully completed.

As at April 16, 2014, the following amounts are still to be paid:

- (LF) Cash Fund (PLN): PLN 471 478.41
- (LF) Equity - Dynamic Polish Fund: PLN 30 938.85
- (LF) Balanced - Polish Fund: PLN 254 735.03
- (LF) Equity - Turkish Equity: PLN 15 273.86

## **Notes to the financial statements**

### **As at December 31, 2013 (continued)**

#### **14. Subsequent events**

- The Board of Directors of the Management Company has decided to merge by contribution of all assets and liabilities with effect on January 29, 2014:

- (LF) Special Purpose Greek Max 50 Fund into (LF) Cash Fund (EUR)

This merger is aiming at rationalizing the existing range of products and creating scope for investment efficiencies.

- (LF) Special Purpose Best Performers III Fund has been launched as of March 17, 2014
