	<p>The Swap Counterparty receives from the Sub-Fund during the Investment Period amounts described in the Swap; payment flows will contribute to the realization of the Equity Strategy. Once, on December 22, 2008 the Swap Counterparty will pay to the sub-fund an amount equal to 2% on the Swap's notional amount.</p> <p>The Net Asset Value of the Sub-Fund, and therefore the value of the Sub-Fund's Units will increase (or decrease) in line with the valuation of both the portfolio of securities and the Swap. The Swap's notional amount will on December 22, 2008 correspond to the Sub-Fund's Net Asset Value and will be adjusted on an ongoing basis based on the applicable valuation of the Swap provided on a daily basis by the Swap Counterparty to take into account subscription and redemption requests in the Sub-Fund.</p> <p>The ability of the Sub-Fund to meet its Investment Objective is dependent on the ability of the Swap Counterparty to meet its obligations under the Swap.</p> <p>Liquidities, securities lending and repurchase agreements may be used within the limits described in sections 3.1. and 4. of the Prospectus.</p> <p>The Directors will decide before maturity of the Equity Strategy, whether the Sub-Fund will be liquidated, prolonged for a new term with a new investment objective and policy (in which case the Prospectus will be amended accordingly) or contributed to another Sub-Fund of the Fund. Unitholders will be informed accordingly in due course. Should the Directors decide that the Sub-Fund will be prolonged for a new term or contributed to another Sub-Fund of the Fund, Unitholders will be offered a one month period during which they will have the possibility to redeem their Units free of charge before such changes become effective.</p>

<p>Risk factors</p>	<p>The main risk factors specific to this Sub-Fund are market and credit risks. These are explicitly described in the Investment Objective and are related to the fact the investor could potentially lose part of the capital invested. Other risk factors specific to this Sub-Fund are counterparty risks, reduced by signing Credit Support Annexes with the swap counterparty/ies and the risks associated to investment in equity securities, fixed income securities, mortgage-backed securities and asset-backed securities i.e. market risk, interest rate, liquidity and credit risks and, when relevant, risks associated with the use of financial derivatives. These risks are further described in points (i), (ii), (iii), (iv) and (vii) in "Risk factors" section of the Prospectus.</p> <p>The ability of the Sub-Fund to meet its Investment Objective is dependent on the ability of the swap counterparty/ies to meet their obligations under the Swap Agreements. Also, the aforementioned ability of the Sub-Fund to meet its Investment Objective is dependent on the performance of the investment portfolio. In case of default of the swap counterparty/ies, the Sub-Fund might attempt to replace the defaulting counterparty with a new counterparty at prevailing market conditions and bearing any replacement cost associated with the default of the initial swap counterparty. The same principle is followed in cases of defaults in the investment portfolio.</p> <p>There is no guarantee that the investment-return objective will be achieved.</p> <p>The calculation methodology for the global exposure is the relative VaR.</p> <p>The level of leverage is not expected to exceed 300%.
