ERB Funds VCIC PLC

Report on the Activities of the Financial Year

Principal activities and nature of operations of the Fund

The principal activities of the ERB Funds VCIC PLC (the 'Fund') is the collective investment in transferable securities and/or other liquid financial assets.

Principal risks and uncertainties

The principal risks and uncertainties faced by the Fund are disclosed in Note 1, Note 3 and Note 13 of the combined financial statements.

The operating environment may have a significant impact on the Fund's operations and financial position. Management is taking necessary measures to ensure sustainability of the Fund's operations. However, the future effects of the current economic situation are difficult to predict and management's current expectations and estimates could differ from actual results. Further details on the Fund's operating environment are discussed in Note 1 of the combined financial statements. Additional information is presented in Note 14.

Performance of Compartments

The Fund issues Investor Shares. Shares may be designated in one or more Share Classes with reference to one or more compartments.

As at December 31, 2025 the following compartments are active:

Compartments	Launch date
ERB Short Duration EUR Fund	March 13, 2017
ERB Short Duration USD Fund	March 13, 2017
ERB Income EUR Fund	July 10, 2019

ERB Funds VCIC PLC

Report on the Activities of the Financial Year (continued)

Performance of Compartments (continued)

ERB Short Duration EUR Fund (the "EUR Compartment")

The fund's performance for the year 2025 amounted to: 2.77%

The fund demonstrated significant resilience throughout 2025, navigating a year of core yield volatility with a focus on active risk management and defensive positioning. The fund performed well in the early months, bolstered by a strong rally, before tactically adjusting its government bond exposure in response to the German fiscal shock in March. We successfully rotated out of BTPs into short-dated 2-year maturities and participated in the new 10-year Greek government bond issue, increasing our sovereign allocation to enhance liquidity. In the corporate sleeve, the portfolio remained high-quality and dynamic; notably, we exchanged Hellenic Bank Tier 2 bonds for the new Eurobank issue following their acquisition and added resilient names like Hyundai and Ford to the primary market mix. Toward the end of the year, we took decisive action to exit our Romanian positions due to escalating political uncertainty, redeploying those funds into Energean bonds to capture attractive yields. The fund enters 2026 well-diversified and strategically positioned to deliver stable income while mitigating duration risk.

ERB Short Duration USD Fund (the "USD Compartment")

The fund's performance for the year 2025 amounted to: 4.07%

Throughout 2025, the fund maintained a disciplined and consistent preference for the shorter end of the yield curve. This strategic anchoring was predicated on the elevated yields and attractive carry available in this segment, which provided compelling risk-adjusted returns compared to the more volatile longer end of the curve. By focusing on this area, the fund was able to capture robust income streams while remaining effectively insulated from the broader duration volatility that characterized the U.S. Treasury market for much of the year. Our portfolio activity remained focused on high-quality reinvestment, including the addition of five-year Polish government bonds and the rolling of maturing U.S. Treasuries into new two-year securities. This approach enabled the fund to effectively manage risk in an unpredictable policy environment, finishing the year in a strong position to continue capturing attractive yields as we move into 2026.

ERB Income EUR fund

The fund's performance for the year 2025 amounted to: 2.22%

The fund delivered a resilient performance in 2025, successfully recovering from early-year market setbacks to end on a positive note. The fund remained fully invested throughout the year, with a focus on proactive risk management and geographic diversification. A key strategic move involved the full exit from Romanian bonds following a deterioration in the country's macroeconomic outlook, with the proceeds being prudently redeployed into higher-quality issues from Madrid and CDEP. In the latter half of the year, we focused on capturing stable income by reinvesting coupon payments into investment-grade leaders such as National Bank of Greece and Hellenic Bottling. Despite periods of volatility in the broader bond markets, the fund benefited from the consistent tightening of credit spreads and robust institutional demand, ensuring a steady stream of returns for investors as we transition into 2026.

ERB Funds VCIC PLC

Report on the Activities of the Financial Year (continued)

Use of financial instruments by the Fund

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

The Fund's risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Fund's financial performance. Risk management is carried out by a central treasury department under policies approved by the Board of Directors and the Management Company. The treasury department identifies and evaluates financial risks in close co-operation with the Fund's operating units. The Board provides written principles for overall risk management, as well as written policies covering specific areas, such as interest rate risk, credit risk, non-derivative financial instruments, and investment of excess liquidity.

The financial risks faced by the Fund are disclosed in Note 3 of the combined financial statements.

Management Company remuneration

The total Management Company's remuneration (only staff that provided services for more than three months during the fiscal year 2025 is included), amounted to €2.796.513 and the active staff as of December 31, 2025, amounted to 39 people.

Fixed remuneration is gender-neutral, permanent, based on predetermined criteria, transparent, non-optional and irrevocable. It reflects the educational level, experience, the importance of the position in the labor market, the level of expertise and skills and the operational requirements of each position. It concerns salaries, allowances, imputed income from the use of a company car and employer contributions to the group pension plan of the Management Company.

Variable remuneration is provided as a reward for the individual performance of the employee in combination with the collective performance of the Management Company and is in accordance with the principles described in the Remuneration Policy. The Management Company can provide guaranteed variable remuneration, incentive programs, retention programs and optional retirement benefits.

Remuneration broken down by category of employees or other staff members, as referred to in Article 14a (3) of Directive 91/2014, is as follows:

Staff category	FIXED REMUNERATION	VARIABLE REMUNERATION
Senior management	594.158	210.500
Risk takers	1.056.983	160.450
Control functions	166.926	15.800
Support Functions	541.696	50.000
Total	2.359.763	436.750

ERB Funds VCIC PLC

Report on the Activities of the Financial Year (continued)

Management Company remuneration (continued)

The total above-mentioned remuneration is not reimbursed to the mutual funds but only to the Management Company.

The implementation of the Remuneration Policy was assessed by the Management Company's internal audit unit and, as reflected in the audit memorandum of 28.11.2025, the result was satisfactory without any relevant findings.

The Board of Directors, on its resolution dated 24.12.2024, approved the Remuneration Policy revision. The revision was made to comply with the Remuneration Policy of Eurobank S.A.

The remuneration policy of the Management Company (which includes, inter alia, a detailed description of the way in which wages and benefits are being calculated, as long as the approval process) is available on the Management Company's official website www.eurobankam.gr.

Future developments of the Fund

The Board of Directors and the Management Company do not expect any significant changes or developments in the operations, financial position, and performance of the Fund in the foreseeable future.

Results

The Fund's results for the period are set out on page 14 of the combined financial statements.

Board of Directors

The members of the Board of Directors at 31 December 2025 and at the date of this report are shown on page 3. All of them were members of the Board throughout the year ended 31 December 2025.

Events after the reporting date

Following the balance sheet date, several significant events have unfolded that could materially affect global economies and financial markets. Most notably, the outbreak of war in Iran has introduced a new layer of geopolitical uncertainty, leading to sharp increases in oil prices and heightened volatility across international markets. This conflict, alongside the ongoing Russia-Ukraine war, the Israel-Gaza situation, and persistent macroeconomic challenges, has further unsettled investor sentiment and disrupted supply chains.

The escalation of the Iran conflict has compounded existing market volatility, amplifying investor concerns about global trade, energy security, and future returns. While governments and financial institutions have responded with various measures to mitigate risk, the effects are still unfolding and have led to increased uncertainty regarding the economic outlook.

Report on the Activities of the Financial Year (continued)

Events after the reporting date (continued)

The implications for the Funds remain a matter of concern. The evolving geopolitical landscape, particularly in relation to the Iran war, introduces additional risks to future profitability and returns.

Management continues to closely monitor these developments and is prepared to implement proactive measures as circumstances require, in order to navigate the challenges posed by this highly unpredictable environment.

Depending on the extent and severity of the Iran conflict, the Russia-Ukraine war, the Israel-Gaza conflict, and broader macroeconomic developments, including the continued negative impact on economic activity, the Company may experience adverse results, liquidity constraints, and potential impairments to its assets in subsequent periods. The precise impact on the Company's activities in 2026 and beyond remains difficult to predict with certainty.

Management will continue to assess the situation carefully and will take all appropriate steps to mitigate any adverse effects arising from these events.

There were no other material events after the reporting date, which have a bearing on the understanding of the financial statements.

Independent auditors

The Independent auditors, PricewaterhouseCoopers Limited, have expressed their willingness to continue in office. A resolution giving authority to the Board of Directors to fix their remuneration will be proposed at the Annual General Meeting.

Independent Auditor's Report

To the Members of ERB Funds VCIC PLC comprising the compartments of ERB Short Duration EUR Fund, the ERB Short Duration USD Fund and ERB Income EUR Fund

Report on the Audit of the Combined Financial Statements

Opinion

We have audited the combined financial statements of ERB Funds VCIC PLC (the “Fund” or “Company”) comprising the ERB Short Duration EUR Fund, the ERB Short Duration USD Fund and the ERB Income EUR Fund (the “Compartments”), which are presented in pages 12 to 52 and comprise the combined statement of financial position as at 31 December 2025, and the combined statements of comprehensive income, changes in net assets and cash flows for the year then ended, and notes to the combined financial statements, including material accounting policy information.

In our opinion, the accompanying combined financial statements give a true and fair view of the financial position of the Company as at 31 December 2025, and of its financial performance and its cash flows for the year then ended in accordance with IFRS Accounting Standards as adopted by the European Union and the requirements of the Cyprus Companies Law, Cap. 113.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Combined Financial Statements* section of our report. We are independent of the Company in accordance with the *International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code)* together with the ethical requirements that are relevant to our audit of the combined financial statements in Cyprus, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors is responsible for the other information. The other information comprises the Report on the Activities of the Financial Year but does not include the combined financial statements and our auditor's report thereon.

Our opinion on the combined financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the combined financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the combined financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors for the Combined Financial Statements

The Board of Directors is responsible for the preparation of the combined financial statements that give a true and fair view in accordance with IFRS Accounting Standards as adopted by the European Union and the requirements of the Cyprus Companies Law, Cap. 113, and for such internal control as the Board of Directors determines is necessary to enable the preparation of combined financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the combined financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Combined Financial Statements

Our objectives are to obtain reasonable assurance about whether the combined financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these combined financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the combined financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors.

- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the combined financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the combined financial statements, including the disclosures, and whether the combined financial statements represent the underlying transactions and events in a manner that achieves true and fair view.

We communicate with the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Other Matter

This report, including the opinion, has been prepared for and only for the Company's members as a body in accordance with Section 69 of the Auditors Law of 2017 and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whose knowledge this report may come to.

ERB Funds VCIC PLC

Notes on the Combined Financial Statements of December 31, 2025

1. General information

Country of incorporation

The ERB Funds VCIC PLC (“The Fund”) and its compartments, namely ERB Short Duration EUR Fund, ERB Short Duration USD Fund and ERB Income EUR Fund, is a public company limited by shares incorporated in Cyprus on January 31, 2017 under the Companies Law of Cyprus with registration number HE365588 and authorised on August 1, 2016 by the Cyprus and Exchange Commission as a UCITS Variable Capital Investment Company with several investment compartments under the UCI Law under license number UCIT 08/78. The Company has been established for an unlimited period of time.

Principal activities

The Company’s Memorandum of Association provides that the sole object of the Company is the collective investment in transferable securities and/or other liquid financial assets of capital raised from the public operating on the principle of risk spreading in accordance with the UCITs Law.

Management Company

The Company has appointed Eurobank Asset Management Mutual Fund Management Company S.A. (“Eurobank Asset Management M.F.M.C”) as the management company with administration delegated to Eurobank S.A.

Investment Restrictions information

All sub-funds, as of 31 December 2025 had no breaches according to the investment restrictions described in art 42 78 Law_2012 for UCITS, as subsequently amended.

Operating environment of the Company

Macroeconomic Conditions

Throughout 2025, the global economy continued to face considerable headwinds. The U.S. economy remained relatively robust, supported by ongoing fiscal stimulus and strong consumer demand, although growth was tempered by rising interest rates and persistent inflation. In contrast, the Eurozone struggled with sluggish industrial output, energy market disruptions, and elevated inflation, while the United Kingdom grappled with a cost-of-living crisis and subdued GDP growth. The Chinese economy showed signs of recovery following the easing of pandemic restrictions but faced challenges related to property sector instability and weak export demand. Volatility in global bond yields mirrored these divergent trends, with investor sentiment fluctuating in response to shifting macroeconomic conditions, major central bank decisions, and geopolitical uncertainty.

ERB Funds VCIC PLC

1. General information (continued)

Operating environment of the Company (continued)

Inflation and Monetary Policy

Inflation remained stubbornly high across major economies over the course of 2025, exacerbated by renewed tariff measures, ongoing supply chain disruptions, and elevated energy prices resulting from geopolitical tensions. The U.S. Federal Reserve and European Central Bank continued to tighten monetary policy, raising interest rates to combat inflation, which contributed to market volatility and increased borrowing costs. The Bank of England also maintained a restrictive stance, though the effectiveness of these measures was limited by external shocks and domestic price pressures. This period saw frequent adjustments in bond yields as markets responded to the interplay between inflation, monetary tightening, and growth risks.

Trade and Tariff Policies

Throughout 2025, trade tensions escalated further with the U.S. administration imposing additional tariffs on goods from China, Mexico, Canada, and the EU. These measures increased production and import costs for global industries, particularly in manufacturing and technology, resulting in margin pressures and credit rating concerns. European corporate bonds showed relative stability, but U.S. corporate bond spreads widened, reflecting heightened risk and stagflationary conditions. The global trade environment was further complicated by ongoing Brexit-related negotiations and new trade agreements, adding uncertainty for companies operating internationally.

Geopolitical Factors

Geopolitical instability remained a dominant theme in 2025. The Russia-Ukraine conflict persisted, with new sanctions and restrictions imposed by the EU, UK, and US, leading to further disruptions in energy markets and global supply chains. The Israel-Gaza conflict continued to escalate, affecting investor confidence and contributing to economic uncertainty. Additionally, tensions in the South China Sea and between Taiwan and China increased, leading to concerns over global trade routes and security. Emerging markets with close trade links to the U.S. and EU, such as Mexico, China, and Eastern European countries, experienced capital outflows, currency volatility, and higher borrowing costs as investors sought safer assets.

Investor Sentiment

Investor sentiment in 2025 was shaped by ongoing macroeconomic and geopolitical risks. The demand for safe-haven assets such as U.S. Treasuries, German Bunds, and gold remained strong, although the reliability of U.S. Treasuries as a safe haven was intermittently questioned due to yield volatility and fiscal policy debates. Equity and bond markets experienced frequent swings as investors reacted to central bank policy announcements, trade disputes, and geopolitical events.

Regulatory Landscape

In early 2025, the European Union implemented new regulatory requirements impacting disclosure obligations and reporting standards for UCITS funds, requiring operational adjustments for compliance. Globally, financial institutions faced growing scrutiny regarding ESG (Environmental, Social, and Governance) reporting and anti-money laundering practices. These regulatory changes further complicated the operating environment for companies, increasing compliance costs and operational risks.

ERB Funds VCIC PLC

1. General information (continued)

Operating environment of the Company (continued)

War between Russia and Ukraine

In response to the military operation of Russia in Ukraine, a number of sanctions have been imposed on Russian entities to restrict them from having access to foreign financial markets, including removing access of several Russian banks to the international SWIFT system.

The EU, UK and US (amongst others) have also imposed sanctions against the Russian central bank, restricting the access of the Russian state to foreign currency reserves, and introduced further asset freezes against designated individuals/entities and sectoral sanctions.

The situation is still evolving and further sanctions and limitations on business activity of companies operating in the region, as well as consequences on the Russian economy in general, may arise but the full nature and possible effects of these are unknown.

Nonetheless, the Company is not significantly impacted from the conflict, as its operations are not affected by the situation however it will continue monitoring the situation and take action if required.

Israel – Gaza conflict

The Israel-Gaza conflict has escalated significantly after Hamas launched a major attack on 7 October 2023. Companies with material subsidiaries, operations, investments, contractual arrangements or joint ventures in the War area might be significantly exposed. Entities that do not have direct exposure to Israel and Gaza Strip are likely to be affected by the overall economic uncertainty and negative impacts on the global economy and major financial markets arising and negative impacts on the global economy and major financial markets arising from the war. This is a volatile period and situation, however, the Company is not directly exposed. The Management will continue to monitor the situation closely and take appropriate actions when and if needed.

Armed conflict in Middle East

On 28 February 2026, the geopolitical situation in the Middle East escalated due to the armed conflict. The situation has created heightened uncertainty in international relations and financial markets, with potential implications for global trade, energy supply, and overall economic stability.

Although the conflict is taking place outside Cyprus, it may have indirect effects on the Cypriot economy, given its openness and reliance on international trade, tourism, shipping, and financial services. Potential consequences include volatility in energy and commodity prices, disruptions in global supply chains, fluctuations in foreign exchange and capital markets, and heightened uncertainty in sectors such as tourism and transport. The extent and duration of these effects remain uncertain and cannot be reliably estimated at this stage.

Additional information regarding developments after the year-end impacting the Company's operating environment is presented in Note 14.

2. Material accounting policy information

The material accounting policies applied in the preparation of these combined financial statements are set out below.

Basis of Preparation

The combined financial statements have been prepared in accordance with IFRS Accounting Standards as adopted by the European Union and the requirements of the Cyprus Companies Law, Cap. 113. The combined financial statements further comply to the regulations prevailing in the Republic of Cyprus relating to undertakings for collective investment schemes and conform to the provisions of the Open-Ended Undertaking of Collective Investments Law of 2012, as subsequently amended.

IFRS Accounting Standards comprise the following authoritative literature:

- IFRS Accounting Standards;
- IAS Standards; and
- Interpretations developed by the IFRS Interpretations Committee (IFRIC Interpretations) or its predecessor body, the Standing Interpretations Committee (SIC Interpretations).

As of the date of the authorisation of the combined financial statements, all IFRS Accounting Standards issued by the International Accounting Standards Board (IASB) that are effective as of 1 January 2025 have been adopted by the European Union through the endorsement procedure established by the European Commission.

The financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets at fair value through profit or loss.

The preparation of the combined financial statements in conformity with IFRS Accounting Standards requires the use of certain critical accounting estimates. It also requires the Board of Directors to exercise its judgment in the process of applying the Fund's accounting policies.

The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the combined financial statements are disclosed in Note 4.

Adoption of New and Revised IFRS Accounting Standards

During the current year the Company adopted all the new and revised IFRS Accounting Standards that are relevant to its operations and are effective for accounting periods beginning on 1 January 2025. This adoption did not have a material effect on the accounting policies of the Company.

At the date of approval of these combined financial statements, a number of new standards and amendments to standards and interpretations are effective for annual periods beginning after 1 January 2025 and have not been applied in preparing these combined financial statements. None of these is expected to have a significant effect on the combined financial statements of the Company, except of the following set out below:

2. Material accounting policy information (continued)

Adoption of New and Revised IFRS Accounting Standards (continued)

- IFRS 18 Presentation and Disclosure in Financial Statements (issued on 9 April 2024 and effective for annual periods beginning on or after 1 January 2027). IFRS 18 will replace IAS 1 Presentation of financial statements, introducing new requirements that will help to achieve comparability of the financial performance of similar entities and provide more relevant information and transparency to users. Even though IFRS 18 will not impact the recognition or measurement of items in the combined financial statements, its impacts on presentation and disclosure are expected to be pervasive, in particular those related to the combined statement of comprehensive income and providing management-defined performance measures within the combined financial statements. Management is currently assessing the detailed implications of applying the new standard on the Company's combined financial statements.

Foreign Currency Translation

(a) Functional and presentation currency

The Company is an umbrella fund with segregated liability between its Sub-Funds. The following Sub-Funds have been established:

Short Duration Sub-Funds

- "ERB Short Duration EUR Fund", Reference currency: **Euro**
- "ERB Short Duration USD Fund", Reference currency: **US Dollar**
- "ERB Income EUR Fund", Reference currency: **Euro**

As of the date of this Prospectus and according to the provisions of the UCI Law and the CySEC Directive DI-78-2012-19 on the constitution, functioning and dissolution of UCITS with multiple investment compartments, the Company shall maintain for each Sub-fund a separate pool of assets.

Each compartment is independent and it is constituted by a separate pool of assets, which are invested in accordance with the investment objectives and policy and/or risk profile of each of the Sub-Funds. Each Sub-Fund issues shares corresponding to the assets constituting its share capital. Separate books and records will be maintained for each Sub-Fund. In addition, duties and charges or any other aspects may differ among the Company's Sub-Funds. The rights of Shareholders and of creditors created by the constitution, operation or dissolution of a particular Sub-Fund are limited to the assets of this Sub-Fund.

- **ERB Short Duration EUR Fund**", Reference currency: **Euro**

The Fund's investors are mainly from the Eurozone, with the subscriptions and redemptions of the redeemable shares denominated in Euro. The primary activity of the Fund is to invest in EUR fixed income transferable securities and deposits and to offer Eurozone investors' consistent absolute returns. The performance of the Fund is measured and reported to the investors in euro. The Board of Directors considers the euro as the currency that most faithfully represents the economic effects of the underlying transactions, events and conditions.

2. Material accounting policy information (continued)

Foreign Currency Translation (continued)

(a) Functional and presentation currency (continued)

■ “ERB Short Duration USD Fund”, Reference currency: US Dollar

The Fund’s investors are mainly from the Eurozone, with the subscriptions and redemptions of the redeemable shares denominated in USD. The primary activity of the Fund is to invest in USD fixed income transferable securities and deposits and to offer Eurozone investors’ consistent absolute returns. The performance of the Fund is measured and reported to the investors in USD. The Board of Directors considers the USD as the currency that most faithfully represents the economic effects of the underlying transactions, events and conditions.

■ ERB Income EUR Fund”, Reference currency: Euro

The Fund is addressed to institutional investors mainly from the Eurozone, with the subscriptions and redemptions of the redeemable shares denominated in Euro. The primary activity of the Fund is to invest in EUR fixed income transferable securities and deposits and to offer Eurozone investors’ consistent absolute returns. The performance of the Fund is measured and reported to the investors in euro. The Board of Directors considers the euro as the currency that most faithfully represents the economic effects of the underlying transactions, events and conditions.

The financial information of each sub-fund is presented in the respective currency as follows:

Sub-Fund	Currency
ERB Short Duration EUR Fund	EUR
ERB Short Duration USD Fund	USD
ERB Income EUR Fund	EUR

The combined financial statements of the Company are presented in Euro, which is the Company’s presentation currency.

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign currency assets and liabilities are translated into the functional currency using the exchange rate prevailing at the statement of financial position date.

Foreign exchange gains and losses arising from translation are included in the statement of comprehensive income. Foreign exchange gains and losses relating to the financial assets and liabilities carried at fair value Through profit or loss are presented in the statement of comprehensive income within ‘foreign exchange differences.

The market value of investments and other assets and other liabilities, expressed in foreign currencies, are translated into the reporting currency of each sub-fund at end of period exchange rates. Exchange differences arising on foreign currency translation are offset with profit and losses. The combined statements are calculated at end of period exchange rates except of the Combined Statement of Comprehensive Income where the period average exchange rate has been used.

ERB Funds VCIC PLC

2. Material accounting policy information (continued)

Foreign Currency Translation (continued)

(b) Transactions and balances (continued)

Closing exchange rate as at December 31, 2025 are:

- 1 EUR = 1,1750 USD

Average exchange rate for the period 1 January 2025 until December 31, 2025 are:

- 1 EUR = 1,1278 USD

Closing exchange rate as at December 31, 2024 are:

- 1 EUR = 1,0389 USD

Average exchange rate for the period 1 January 2024 until December 31, 2024 are:

- 1 EUR = 1,0821 USD

The foreign currency translation adjustment arising from translation of USD balances relating to the ERB Short Duration USD Fund for the purposes of preparing the Company combined EUR amounts has been included in the Combined Statement of Changes in Net Assets. The notional currency translation adjustment for the financial year ended 31 December 2025 was EUR (291.411) (2024: EUR 196.603). This does not impact the NAV of any individual Sub-Fund.

Interest income

Interest income from financial assets at FVTPL calculated using the nominal interest rates is included in 'Interest Income' and disclosed separately in the notes to the combined financial statements. Interest income on financial assets at amortized cost calculated using the effective interest method is recognized in the combined statement of comprehensive income as 'Interest Income' and disclosed separately in the notes to the combined financial statements. Interest income on financial assets at amortized cost is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for financial assets that subsequently become credit impaired. For credit - impaired financial assets - Stage 3 the effective interest rate is applied to the net carrying amount of the financial asset (after deduction of the loss allowance), for Stage 1 and Stage 2 - gross amount of financial assets.

Dividend income

Dividends are received from financial assets measured at fair value through profit or loss (FVTPL). Dividends are recognized as dividend income in profit or loss when the right to receive payment is established.

Current and deferred income tax

The tax expense for the period comprises current and deferred tax. Tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

2. Material accounting policy information (continued)

Current and deferred income tax (continued)

The current income tax is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the country in which the Company operates and generates taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. If applicable tax regulation is subject to interpretation, it establishes provision where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is recognized using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of transaction affects neither accounting nor taxable profit nor loss. Deferred income tax is determined using tax rates and laws that have been enacted or substantively enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred income tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority on the Company where there is an intention to settle the balances on a net basis.

Financial assets and financial liabilities at fair value through profit or loss

(a) Classification

The Fund classifies its investments in debt and equity securities, as financial assets or financial liabilities at fair value through profit or loss.

This category has two sub-categories: financial assets or financial liabilities held for trading; and those designated at fair value through profit or loss at inception. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of financial assets at initial recognition.

(i) Financial assets and liabilities held for trading

A financial asset or financial liability is classified as held for trading if it is acquired or incurred principally for the purpose of selling or repurchasing in the near term or if on initial recognition is part of a portfolio of identifiable financial investments that are managed together and for which there is evidence of a recent actual pattern of short-term profit taking.

(ii) Financial assets and liabilities designated at fair value through profit or loss at inception

2. Material accounting policy information (continued)

Financial assets and financial liabilities at fair value through profit or loss (continued)

(a) Classification (continued)

Financial assets and financial liabilities designated at fair value through profit or loss at inception are financial instruments that are not classified as held for trading but are managed, and their performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy.

(b) Fair value estimation

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of financial assets and liabilities traded in active markets are based on quoted market prices at the close of trading on the reporting date. The Fund utilizes bid-market prices from Bloomberg's evaluated pricing service, BGN, for the valuation of investments in bonds. In circumstances where the Bid market price is not available or within the bid-ask spread, management will determine the point within the bid-ask spread that is most representative of fair value.

The fair value of financial assets and liabilities that are not traded in an active market (for example, over-the-counter derivatives) is determined using valuation techniques. The Fund uses a variety of methods and makes assumptions that are based on market conditions existing at each reporting date. Valuation techniques used include the use of comparable recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants making the maximum use of market inputs and relying as little as possible on entity specific inputs.

Financial instruments in level 1

The fair value of financial instruments traded in active markets is based on quoted market prices at the balance sheet date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the Company is the current bid price. These instruments are included in level 1.

Financial instruments in level 2

The fair value of financial instruments that are not traded in an active market (for example, unlisted equity securities) is determined by using valuation techniques.

These valuation techniques maximize the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

3. Material accounting policy information (continued)

Financial assets and financial liabilities at fair value through profit or loss (continued)

(b) Fair value estimation (continued)

Financial instruments in level 3

If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

Specific valuation techniques used to value financial instruments include:

- Quoted market prices or dealer quotes for similar instruments.
- Adjusted comparable price-to-book value multiples.
- Other techniques, such as discounted cash flow analysis.

(c) Recognition, de-recognition and measurement

Regular purchases and sales of investments are recognized on the trade date – the date on which the Fund commits to purchase or sell the investment. Financial assets and financial liabilities at fair value through profit or loss are initially recognized at fair value. Transaction costs are expensed as incurred in the statement of comprehensive income.

Financial assets are derecognized when the rights to receive cash flows from the investments have expired or the Fund has transferred substantially all risks and rewards of ownership.

Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the 'financial assets or financial liabilities at fair value through profit or loss' category are presented in the statement of comprehensive income within other net changes in fair value of financial assets and liabilities at fair value through profit or loss in the period in which they arise.

Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the company or the counterparty.

Due from and due to brokers

Amounts due from and to brokers represent receivables for securities sold and payables for securities purchased that have been contracted for but not yet settled or delivered on the statement of financial position date respectively.

These amounts are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method.

2. Material accounting policy information (continued)

Effective interest rate method

Effective interest rate method is a method of calculating the amortized cost of a financial asset or financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts throughout the expected life of the financial instrument, or, when appropriate, a shorter period, to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Fund estimates cash flows considering all contractual terms of the financial instrument but does not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

Cash and Cash Equivalents

Cash and cash equivalents includes cash in hand, deposits held at call with banks and other short-term investments in an active market with original maturities of three months or less. Time deposits that cannot be withdrawn before the maturity date are presented separately on the combined statement of financial position. Cash and cash equivalents are carried at amortised cost because: (i) they are held for collection of contractual cash flows and those cash flows represent SPPI, and (ii) they are not designed at fair value through profit or loss.

Payables and accrued expenses

Payables and accrued expenses are recognized initially at fair value and subsequently stated at amortized cost using the effective interest method.

Redeemable Shares

Each sub-fund issues one class of redeemable shares. Redeemable shares can be put back to the Fund at any dealing date for cash equal to a proportionate share of the Fund's net asset value attributable to the share class. Shares are redeemable daily.

The redeemable shares are carried at the redemption amount that is payable at the statement of financial position date if the holder exercises the right to put the share back to the Fund.

Redeemable shares are issued and redeemed at the holder's option at prices based on the Fund's net asset value per share at the time of issue or redemption. The Fund's net asset value per share is calculated by dividing the net assets attributable to the holders of each class of redeemable shares with the total number of outstanding redeemable shares for each respective class. In accordance with the provisions of the Fund's regulations, investment positions are valued based on the last traded market price for the purpose of determining the net asset value per share for subscriptions and redemptions.

Transaction Costs

Transaction costs are costs incurred to acquire financial assets or liabilities at fair value through profit or loss. They include fees and commissions paid to agents, advisers, brokers and dealers. Transaction costs, when incurred, are immediately recognized in profit or loss as an expense.

3. Financial Risk Management

Financial and other risks

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

The Fund is also exposed to various operational risks such as custody risk. Custody risk is the risk of loss of securities held in custody occasioned by the insolvency or negligence of the custodian. Although an appropriate legal framework is in place that eliminates the risk of loss of value of the securities held by the custodian, in the event of its failure, the ability of the Fund to transfer securities might be temporarily impaired.

The Fund's overall risk management program seeks to maximize the returns derived for the level of risk to which the Fund is exposed and seeks to minimize potential adverse effects on the Fund's financial performance.

The management of these risks is carried out by the Risk Management Department of the Management Company under policies approved by the Board of Directors. The Risk Management Department provides written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, the use of derivative financial instruments and non-derivative financial instruments and the investment of excess liquidity.

The risk management policy is approved, reviewed on a regular basis and, if necessary, revised by the Board of Directors. The Board of Directors is responsible for the appropriateness and effectiveness of the risk management process.

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below.

Market risk

(a) Price risk

Each Sub-Fund is exposed to debt securities price risk. This arises from investments held by the Sub-Fund for which prices in the future are uncertain.

The Fund's policy is to manage price risk through diversification and selection of financial instruments within specified limits set. According to the prospectus, the percentage of ERB Short Duration EUR Fund's assets invested in fixed income debt securities and deposits must be within the range of 55%-100% and 0%-45%, respectively. The percentage of ERB Short Duration USD Fund's assets invested in money market instruments (MMI), fixed income debt securities and deposits must be within the range of (i) MMI and fixed income debt securities: 55%-100%, and (ii) Deposits: 0%-45%. The percentage of the ERB Income EUR Fund's assets invested in fixed income securities, money market instruments (MMI) and deposits must be within the range of (i) Fixed income securities: 55%-100%, and (ii) Deposits: 0%-45%.

3. Financial Risk Management (continued)

Market risk (continued)

(a) Price risk (continued)

Undertaking for collective investments, financial derivative instruments, structured financial instruments, securities lending and repurchase agreements may be used within the limits specified in Fund's prospectus.

The Fund is not invested in derivative positions.

(b) Foreign exchange risk

At 31 December, there was no material exposure denominated in foreign currencies at each Sub-Fund level.

(c) Cash flow and fair value interest rate risk

Interest rate risk arises from the effects of fluctuations in the prevailing levels of markets interest rates on the fair value of financial assets and liabilities and future cash flow. The Sub-Funds hold fixed interest securities that expose them to fair value interest rate risk. The Sub-Funds also hold a limited amount of floating rate debt and cash and cash equivalents that expose them to cash flow interest rate risk. The Fund's policy requires the Investment Manager to manage this risk by measuring the mismatch of the interest rate sensitivity gap of financial assets and liabilities and calculating the average duration of the portfolio of fixed interest securities. The average effective duration of the Fund's portfolio is a measure of the sensitivity of the fair value of the Fund's fixed interest securities to changes in market interest rates.

According to their investment policy, the average duration of the Sub-Funds is not expected to exceed a five year period. The table below summarizes the relative sensitivity to interest rate changes for each Sub-Fund. This measure of duration for the portfolio indicates the approximate percentage change in the value of the portfolio if interest rates change by 100 basis points.

	Duration	
	31 December 2025	31 December 2024
ERB Short Duration EUR Fund	2,59	2,03
ERB Short Duration USD Fund	1,29	1,35
ERB Income EUR Fund	4,25	5,02

For the case of ERB Short Duration EUR, at 31 December 2025, if interest rates had been lower/higher by 100 (12/2024:100) basis points with all other variables held constant, the change in net assets attributable to redeemable shareholders would have been 2.59% (12/2024: 2.03%) higher/lower.

For the case of ERB Short Duration USD, at 31 December 2025 if interest rates had been lower/higher by 100 (12/2024:100) basis points with all other variables held constant, the change in net assets attributable to redeemable shareholders would have been 1.29% (12/2024: 1.35%) higher/lower.

3. Financial Risk Management (continued)

Market risk (continued)

(c) Cash flow and fair value interest rate risk (continued)

For the case of ERB Income EUR Fund, at 31 December 2025, if interest rates had been lower/higher by 100 (12/2024:100) basis points with all other variables held constant, the change in net assets attributable to redeemable shareholders would have been 4.25% (12/2024: 5.02%) higher/lower.

The interest rate effect primarily arises from the increase/decrease in the fair value of fixed interest securities, with a small proportion arising from the decrease/increase in interest income on cash and cash equivalents.

(d) Global Exposure and Leverage Methodology

Global Exposure

The risk-management process involves the calculation of the global exposure of each Sub-Fund. Based on the investment strategy of the Sub-Funds, the Absolute Value-at-Risk ("Absolute VaR") approach has been chosen as the most suitable method to be applied.

In terms of assumptions and mathematical foundations of the model, the Fund is using the 1 Year Data, 1 Month VaR at 99% confidence interval combination. The model's methodology is the Historical Simulation.

The limit in terms of global exposure is set to be that the Sub-Fund's 1 Month VaR should not exceed the 1 Month Absolute VaR Limit, which has been set to 3% for the ERB Short Duration EUR and the ERB Short Duration USD, while for the ERB Income EUR Fund is at 10%.

The VaR model chosen provides for completeness and assesses the risks with a high level of accuracy. Risk Management Department assures that the model captures all the material market risks associated with portfolio positions.

Risk Management Department calculates the Sub-Funds global exposure on at least a daily basis. The limits on global exposure must be complied with on an ongoing basis.

ERB Funds VCIC PLC

3. Financial Risk Management (continued)

Market risk (continued)

(d) Global Exposure and Leverage Methodology

Leverage

The Sub-Funds may achieve some leverage through the use of financial derivatives instruments for the purpose of making investments/hedging purposes. The leverage of derivative instruments is calculated using the Sum of Notionals approach for all UCITS portfolios that have derivatives exposure.

At 31 December, none of the Sub-Funds is leveraged since none of the Sub-Funds has exposure to financial derivative positions.

The table below summarizes the global exposure utilization and leverage figures for FY 2025 and FY 2024 for each Sub-Fund. Utilization figures refer to the period that an Absolute VaR Limit of 3% and 10% was applied according to the fund analyzed.

2025

3. Financial Risk Management (continued)

Liquidity risk

Liquidity risk is the risk that the Fund may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

All Funds are Short-Term Funds which seek to provide investors with consistent absolute returns primarily through investing in securities with duration typically less than 5 years. The resulting portfolio is therefore expected to be relatively liquid and diversified. In normal market conditions, the majority of the Sub-Fund's assets will be comprised of 'liquid' assets, meaning that assets that can be easily purchased or sold. However, in some circumstances there is a risk for some investment to become relatively illiquid making it difficult to acquire or dispose of them at the prices quoted on the various exchanges. Therefore, the Sub-Fund may not be able to sell assets to meet the redemption requirement or may only be able to sell the assets at a price which negatively affects the Net Asset Value of the Fund.

In order to manage the Fund's overall liquidity, the Management Company, subject to prior CySEC approval and the conditions laid down in the UCITs Law, may temporarily suspend redemptions or conversion of Shares if this is deemed to be in the best interest of all unit holders and for a period not exceeding one month. The Fund did not withhold any redemption or implement any suspension during 2025 and 2024.

Credit risk

The Fund is exposed to credit risk, which is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

The main concentration to which the Sub-Funds are exposed arises from debt securities investments. The Fund is also exposed to counterparty credit risk on cash and cash equivalents, time deposits, amounts due from brokers and other receivable balances.

An issuer suffering an adverse change in its financial condition could lower the credit quality of a security, leading to greater price volatility of the security. A lowering of the credit rating of a security may also offset the security's liquidity, making it more difficult to sell. Sub-Funds investing in lower quality debt securities are more susceptible to these problems and their value may be more volatile. There can be no assurance that issuers of the securities or other instruments in which a Sub-Fund invests will not be subject to credit difficulties leading to the loss of some or all the investment in such securities.

ERB Funds VCIC PLC

3. Financial Risk Management (continued)

Credit risk (continued)

The analysis below summarizes the credit quality of the Sub-Funds on 31 December:

Debt securities by rating category			
ERB Short Duration EUR	31 December 2025	31 December 2024

A-3	0,00%	0,00%	
B	0,00%	0,00%	
C	0,00%	0,00%	
Non-rated	0,00%	0,00%	
Average Credit Quality	A-1+	A-1	

ERB Income EUR Fund	31 December 2025	31 December 2024	
A-1+	18,68%	17,96%	
A-1	44,21%	41,49%	
A-2	32,04%	34,82%	
A-3	2,82%	4,56%	
B	0,00%	0,00%	
C	0,97%	0,00%	
Non-rated	0,00%	0,00%	
Average Credit Quality	A-1	A-1	

All transactions in listed securities are settled/paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligation.

The maximum exposure to credit risk before any credit enhancements on 31 December is the carrying amount of the financial assets as set out below.

ERB Funds VCIC PLC

3. Financial Risk Management (continued)

Credit risk (continued)

December 31, 2025	ERB short Duration EUR	ERB short Duration USD	ERB Income EUR
Debt Securities	5.392.556	2.421.114	30.273.016
Cash at bank and time deposits	582.641	141.176	103.625
	5.975.197	2.562.290	30.376.641

December 31, 2024	ERB short Duration EUR	ERB short Duration USD	ERB Income EUR
Debt Securities	5.811.591	2.277.248	29.465.786
Cash at bank and time deposits	1.488.052	297.283	231.911
	7.299.643	2.574.531	29.697.697

The Fund measures credit risk and expected credit losses using probability of default, exposure at default and loss given default. Management examined the 12-month ECL since time deposits have a maximum duration of 1 Year. Using the Bloomberg 1 Year Default Probability (DP), ECL has been calculated to be -0.0010% of the fund's NAV for Short Duration EUR Fund. As the ERB Short Duration USD Fund and the ERB Income EUR Fund have no time deposits as at 31 December 2025, they are not exposed to any significant ECL.

31 December 2025 - Bank Deposits ECL:

Portfolio	Positions	Weight	Issuer	Maturity	ECL
905	LANDESBANK BADEN-WUERTEMBERG	6,64%	LANDESBANK BADEN-WUERTEMBERG	2026-01-05	0,0010%
					0,0010%

31 December 2024 - Bank Deposits ECL:

Portfolio	Positions	Weight	Issuer	Maturity	ECL
905	TIME DEPO BANCO SANTANDER SA (EUR)	5,41%	BANCO SANTANDER SA	2025-01-03	-0,01148%
905	TIME DEPO LANDESBANK BADEN-WUERTEMBERG (EUR)	5,41%	LANDESBANK BADEN-WUERTEMBERG	2025-01-07	-0,00079%
					-0,01228%

However, given that most of the positions have a maturity of less than a year (the appropriate DP is lower than the 1Year DP) and the fact that some positions have already matured, the Company estimated the ECL to be less than that calculated. Therefore, ECL is considered to be insignificant and was not recognized.

The clearing and depository operations for the Fund's security transactions are mainly concentrated with one prime broker, namely Eurobank Limited part of the Eurobank Group. Eurobank Group is a member of Athens Stock Exchange, and on December 31 2025 had a credit rating of BBB+. On December 31 2025, substantially all cash and cash equivalents, balances due from broker and investments are placed in custody with Eurobank Limited.

3. Financial Risk Management (continued)

Credit risk (continued)

In the case that the Fund's assets are invested in derivative financial instruments, the Fund is also exposed to credit risk to Eurobank Limited to the extent that collateral provided has been sold or re-pledged. None of the Sub-Funds is currently invested in derivative positions and therefore the Fund is not exposed to such risk as of 31 December 2025.

There are also risks involved in dealing with custodians or brokers who settle trades regarding the segregation of assets. It is expected that all securities and other assets deposited with custodians or brokers will be clearly identified as being assets of the Fund; the Fund should not therefore be exposed to a credit risk with respect to such parties. However, it may not always be possible to achieve this segregation, so the portfolio of the Fund may experience increased exposure to credit risk associated with the applicable custodians or brokers.

Capital risk management

The capital of the Fund is represented by the net assets attributable to holders of redeemable shares. The amount of net assets attributable to holders of redeemable shares can change significantly on a daily basis, as the Fund is subject to daily subscriptions and redemptions at the discretion of shareholders, as well as changes resulting from the Fund's performance. The Fund's objective when managing capital is to safeguard the Fund's ability to continue as going concern in order to provide returns for shareholders, provide benefits for other stakeholders and maintain a strong capital base to support the development of the investment activities of the Fund.

In order to maintain the capital structure, the Fund's policy is to perform the following:

- Monitor the level of daily subscriptions and redemptions relative to the assets it expects to be able to liquidate within 1 day and adjust the amount of distributions the Fund pays to redeemable shareholders
- Redeem and issue new shares in accordance with the constitutional documents of the Fund, which include the ability to restrict redemptions and require certain minimum holdings and subscriptions.

Fair value estimation

The following table presents within the fair value hierarchy the fund's assets and liabilities measured at fair value at 31 December 2025:

	ERB short Duration EUR	ERB short Duration USD	ERB Income EUR
	EUR	USD	EUR
	Level 1	Level 1	Level 1
Financial Assets at Fair value through profit or loss	5.392.556	2.421.114	30.273.016

3. Financial Risk Management (continued)

Fair value estimation (continued)

In comparison to 31 December 2024 respective table:

	ERB short Duration EUR	ERB short Duration USD	ERB Income EUR
	EUR	USD	EUR
	Level 1	Level 1	Level 1
Financial Assets at Fair value through profit or loss	5.811.591	2.277.248	29.465.786

4. Critical accounting estimates and assumptions

4.1 Critical accounting estimates and assumptions

Management makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities are outlined below.

Fair value of financial assets and financial liabilities

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fund assesses the fair value of financial instruments that are traded in active markets based on quoted market prices at the reporting date. All of the Company's financial assets at fair value through profit or loss was measured at the basis of Level 1 fair value hierarchy and hence did not involve any significant estimates or judgements.

9. Statement of Changes in the Investments

Analytical list, per investment compartment, specifying for each investment the total purchases and sales which occurred during the period under review, may be obtained free of charge, upon request, at the Registered Office of the Management Company.

10. Brokerage Commissions and Commissions on Transactions

This element refers to the brokerage transaction expenses and the commissions on transactions that relate to securities and derivatives.

The amounts that refer to the commissions on transactions appear on the profit and loss statement and the statement of changes in investments, in the category "Commission Expenses".

11. Related Party transactions and balances

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

(a) Management Fees

The Fund is managed by Eurobank Asset Management Mutual Fund Management Company S.A. an independent Management Company incorporated in Greece.

The company pays the Management Company a fee in respect of its duties at an agreed upon percentage of the closing Net Asset Value of each of the Company's sub-funds (plus VAT, if any) as specified in the relevant sub-fund supplements.

The Management fee accrues and is reflected in the Net Asset Value calculated on each Valuation Date in relation to each sub-fund and is paid monthly in arrears, in accordance with the provisions set out in the relevant sub-fund's supplement. In addition, the Management Company is entitled to be repaid all of its reasonable out of pocket expenses incurred in the performance of its duties including but not limited to expenses for legal, auditing and consulting services incurred, expenses in the supply of information to shareholders, couriers' fees and other related costs which shall be at normal commercial rates together with VAT, if any, there on.

ERB Funds VCIC PLC

11. Related Party transactions and balances (continued)

(a) Management Fees (continued)

As at December 31, 2025 the following effective rates were applicable per annum:

- ERB Short Duration EUR Fund (total of 17.284 EUR)
 - 01/01/2025-31/12/2025 0,25%
- ERB Short Duration USD Fund (Total of 6.485 US dollar)
 - 01/01/2025-31/12/2025 0,25%
- ERB Income EUR Fund (Total of 77.160 EUR)
 - 01/01/2025-31/12/2025 0,25%

As at December 31, 2024 the following effective rates were applicable per annum:

- ERB Short Duration EUR Fund (total of 27.412 EUR)
 - 01/01/2024-31/12/2024 0,25%
- ERB Short Duration USD Fund (Total of 8.512 US dollar)
 - 01/01/2024-31/12/2024 0,25%
- ERB Income EUR Fund (Total of 74.786 EUR)
 - 01/01/2024-31/12/2024 0,25%

(b) Custody Fees

The Fund has engaged the services of Eurobank Limited, to provide custodian services.

As a return for the services provided the Depositary is entitled to receive from the assets of the investment compartments compensation ("Depositary fees"), paid at the end of each month, for the month elapsed, at an annual rate that does not exceed the one mentioned in the Prospectus. This percentage is calculated on a daily basis on the net value of the unit that day for the entire period that the fee is calculated. Where the Depositary is required to carry out additional duties to those originally agreed and this requires additional work to be performed, the Depositary will be entitled to charge additional fees at a rate as may be agreed in advance with the Directors.

As at December 31, 2025 the following effective rates were applicable per annum:

- ERB Short Duration EUR Fund (Total of 3.457 EUR)
 - 01/01/2025-31/12/2025 0,05%
- ERB Short Duration USD Fund (Total of 1.297 US Dollar)
 - 01/01/2025-31/12/2025 0,05%
- ERB Income EUR Fund (Total of 15.432 EUR)
 - 01/01/2025-31/12/2025 0,05%

ERB Funds VCIC PLC

11. Related Party transactions and balances (continued)

(b) Custody Fees (continued)

As at December 31, 2024 the following effective rates were applicable per annum:

- ERB Short Duration EUR Fund (Total of 5.482 EUR)
 - 01/01/2024-31/12/2024 0,05%
- ERB Short Duration USD Fund (Total of 1.702 US Dollar)
 - 01/01/2024-31/12/2024 0,05%
- ERB Income EUR Fund (Total of 14.954 EUR)
 - 01/01/2024-31/12/2024 0,05%

All cash and cash equivalents, balances due from broker and investments are placed in custody with Eurobank Limited. The ERB Short Duration EUR Fund also holds corporate bonds issued by entities of the Eurobank Group as presented in detail in Note 12.

(c) Fund Administrator Fees

The Fund has engaged the services of Eurobank Ergasias S.A., to provide administration services.

Under the provisions of the Administration Agreement, the Company shall pay to the Administrator out of the assets of the relevant Sub-Funds a monthly fee in arrears applicable to each such Sub-Fund as further set out in the relevant Sub-Fund's Supplement.

The Administrator will also be entitled to be repaid out of the assets of the Company all of its reasonable and properly documented out-of-pocket expenses incurred on behalf of the Company, with each Sub-Fund bearing its proportion of such expenses.

As at December 31, 2025 the following effective rates were applicable per annum:

- ERB Short Duration EUR Fund (Total of 3.457 EUR)
 - 01/01/2025-31/12/2025 0,05%
- ERB Short Duration USD Fund (Total of 1.297 US Dollar)
 - 01/01/2025-31/12/2025 0,05%
- ERB Income EUR Fund (Total of 15.432 EUR)

 - 01/01/2024-31/12/2024 0,05%

11. Related Party transactions and balances (continued)

(d) Directors' Fees

The Directors shall be entitled to a fee in remuneration for their services at a rate to be determined from time to time by the Directors, but so that the aggregate annual amount of Directors' remuneration shall not exceed €15.000. Such fees shall be paid monthly in arrears and will normally be allocated to all Sub-Funds in proportion to the Net Asset Value of the Sub-Funds or otherwise on such basis as the Directors deem fair and equitable.

Any additional Director fees necessitated by the addition of new Sub-Funds shall be apportioned equally among the new Sub-Funds and, to the extent they do not impact on Shareholders in existing Sub-Funds (on the basis that such additional fees are attributed to new Sub-Funds only), will not be subject to existing Shareholder approval.

The Directors may also be paid all travelling, hotel and other expenses properly incurred by them in attending and returning from meetings of the Directors or any committee of the Directors or general meetings of the Company or in connection with the business of the Company.

As at December 31, 2025 the following fixed amount were applicable per annum:

ERB Short Duration EUR Fund: 2.288 EUR

ERB Short Duration USD Fund: 798 US Dollar

ERB Income EUR Fund: 5.084 EUR

As at December 31, 2024 the following fixed amount were applicable per annum:

ERB Short Duration EUR Fund: 3.128 EUR

ERB Short Duration USD Fund: 960 US Dollar

ERB Income EUR Fund: 8.324 EUR

13. Contingencies

As at 31 December 2025, the Sub-Funds had the following possible tax risk exposures for which no provision has been made in the combined financial statements:

Short duration EUR Fund: 168.518 EUR

Short duration USD Fund: 88.086 US Dollar

Income EUR Fund: 329.554 EUR

14. Events after the reporting date

The geopolitical situation in Middle East escalated on 28 February 2026 due to the armed conflict. As of the date of authorization of the combined financial statements, the conflict continues to evolve in Middle East as military activity persists. The conflict has caused significant volatility in global energy market and disruptions to the supply of oil and gas, contributing to increased uncertainty in commodity prices and potential inflationary pressures. Broader consequences have also been observed in financial markets and global supply chains, particularly affecting energy and transportation sectors, as heightened geopolitical tensions around key shipping routes add to market uncertainty. Challenges for companies may include disruptions to supply chains, higher energy and raw material costs and increased uncertainty in operational and financial planning.

The impact on the Company largely depends on the nature and duration of uncertain and unpredictable events, such as further military action and reactions to ongoing developments by global financial markets. The financial effect of the current crisis on the global economy and overall business activities cannot be estimated with reasonable certainty at this stage, due to the pace at which the conflict is evolving and the high level of uncertainties arising from the inability to reliably predict the outcome.

These are events that are indicative of conditions that arose after the reporting period. Therefore, these are considered as a non-adjusting event and thus, are not reflected in the recognition and measurement of the assets and liabilities in the combined financial statements as at 31 December 2025.

The implications for the Funds remain a matter of concern. The evolving geopolitical landscape, particularly in relation to the Iran war, introduces additional risks to future profitability and returns. Management continues to closely monitor these developments and is prepared to implement proactive measures as circumstances require, in order to navigate the challenges posed by this highly unpredictable environment.

Depending on the extent and severity of the Iran conflict, the Russia-Ukraine war, the Israel-Gaza conflict, and broader macroeconomic developments, including the continued negative impact on economic activity, the Company may experience adverse results, liquidity constraints, and potential impairments to its assets in subsequent periods. The precise impact on the Company's activities in 2026 and beyond remains difficult to predict with certainty. Management will continue to assess the situation carefully and will take all appropriate steps to mitigate any adverse effects arising from these events.

There were no other material events after the reporting date, which have a bearing on the understanding of the financial statements.

Independent auditor's report on pages 9-11.
