Investment Objective

This Fund is actively managed and its investment objective is to achieve capital appreciation in the long term.

Investor Profile

The risk and reward category for this Fund is not guaranteed to remain unchanged, and may shift over time.

This Fund may not be appropriate for investors who plan to withdraw their money before the maturity of its investment strategy.

The Fund has a clearly defined target investment date: 31 December 2042 (the "Target Date") which sets the time-frame within which the investment strategy of the fund will unfold along the general guidelines described hereafter:

The Fund adopts a moderately high risk profile at the start of the Investment period when the Target Date is still relatively distant. Subsequently and progressively, the Fund will be increasing its allocation to assets that have a lower risk as the Target Date approaches. On Target Date, the Fund is expected to be invested mainly in debt instruments and/or cash investments.

The Fund invests primarily in UCITS and/or UCI which invest in debt securities, equities, money market instruments, time deposits, cash, as well as in financial derivative instruments including Exchange Traded Funds (ETF). When the investment in UCITS and/or UCI is not considered appropriate, the Fund may be invested directly in underlying targeted assets. Emphasis is placed on international diversification of investments.

The Directors will decide before the Target Date, whether the Fund will be liquidated or contributed to another Fund or to another UCITS of the Management Company to the best interest of shareholders.
